The 2023 Modern Library Awards (MLAs) is proud to announce its review scores from participating companies in this special supplement to Library Products & Services News. The MLAs are an unbiased program recognizing the elite products and services that serve the library industry. Companies provided concise write-ups of their products/services and submitted them for review. These were then sent out to the LibraryWorks readership — librarians in public, academic, K-12, and special libraries — who then submitted their reviews on a 1-10 scoring system. Each judge had to have had experience with the product or service, and each participating company also had to provide four references of library placements to submit their forms. The LibraryWorks staff had no influence on the scoring.

Awards were based on the following scores:
6.5-7.4 Silver 7.5-8.4 Gold 8.5-10.0 Platinum Highest Overall Scores — Product of the Year and Service of the Year

The 2023 roster of honorees includes:

Product of the Year:

*The Crowley Company | Zeutschel ScanStudio Cultural Heritage Scanner

Service of the Year:

*Overton & Associates, LLC | Library Moving Consultants

Platinum Awards:

*AWE Learning | AfterSchool Edge™ Platinum V2
*AWE Learning | Bilingual Spanish Early Literacy Station Platinum V2

The Crowley Company
ZEUSCHEL SCANSTUDIO CULTURAL
HERITAGE SCANNER

The Zeuschel ScanStudio cultural heritage scanner offers an all-in-one graphic art and flexible multimedia digitization station for libraries, archives and museums with diverse collections and media types.

The ScanStudio has proven to be a highly effective and efficient scan system for reflective media (such as maps, prints, rare books, dimensional objects and blueprints) and transmissive media (all photographic materials including glass plate negatives, film negatives, daguerreotypes and more).

With a user-friendly modular universal capture system, the ScanStudio contains a 100 or 150-megapixel digital back camera, a precision (one-second time) shutter, interchangeable lenses and an adjustable Ergo LED lighting system to meet the highest standards of quality. The ScanStudio is also ergonomic friendly to allow maximum productivity for FADGI-capable requirements of up to 4 stars.

HEAR FROM THE JUDGES:

“We’re very happy with the way the Zeuschel ScanStudio was integrated into our workflows, without requiring a scan technician with more extensive photographic background (who was already familiar with Zeuschel products and software). We can readily achieve 3–4-star FADGI results by tweaking calibrations. Crowley has given us excellent support.”

Dear Reader,

I hope you enjoy the 2023 Modern Library Awards special edition and that you take advantage of the outstanding products and services offered by these respected companies. Our entire team would like to thank all judges and applicants who made the 2023 program such a success. Your enthusiasm and encouragement kept us going through another very busy award season and we were overwhelmed by the positive response.

Congratulations to the following judges who were randomly drawn to win a \$25 Amazon gift card: Ashley W., Traci, C., Jill Y., David S., Julie P., Amy A., Derek B., Carla B., Sam C., Jessica T., Michael L., and Erika C.

If you are a librarian and are interested in acting as a judge for the 2024 Modern Library Awards, please email the following information to jenny@libraryworks.com: name, title, email address, and library name. If you have a product or service that you would like to enter in the 2024 Modern Library Awards, please email the following information to sharon@libraryworks.com: name, title, email address, company name, and product/service name(s).

Products that were entered in the 2023 Modern Library Awards are eligible to be entered into the 2024 program.

If you have any questions regarding the MLAs or thoughts to improve, I'd love to hear from you! Please feel free to contact me.

Best regards,

Jenny

ABOUT LIBRARYWORKS

LibraryWorks helps administrators to make informed decisions about library technology, automation and software, collection development and management, facilities and furnishings, staffing, purchasing, and other areas that drive effective strategic planning and day-to-day operations. Our family of resources can enable you to identify best practices, monitor trends, evaluate new products and services, apply for grants and funding, post or find a job, and even enjoy some library humor.

Overton & Associates, LLC

LIBRARY MOVING CONSULTANTS

Overton & Associates, Library Moving Consultants, has been involved in moving libraries since 1985. The owner, Bill Overton, has accumulated a wealth of knowledge that has been acquired by moving over 800 libraries totaling over 50 million books. We are a firm believer that the success of a move will be directly related to the extent of the planning process. The mover and the library must have similar expectations of how the move will be accomplished.

Whether you're moving yourself or utilizing a local mover, let Overton & Associates be your first call. We have been involved in managing projects by utilizing local labor and volunteers. We have saved our clients an average of 40% off their move budget by deciding on the best move solution.

Our latest project, Connecticut College, involved the repurposing of books and shelving to create additional flexible study areas. By reducing the collection footprint by one third, the library was able to add 100 additional study spaces, introduced a new technology commons and quadrupled the number of collaborative spaces.

Our philosophy is simple, prepare our services based upon the library's needs. Our goal is to assist the library throughout the entire process and enable the staff to experience a stress-free relocation project. Our services can encompass the following:

- Pre-move planning
- Move management
- Manage local movers, shelving installers or volunteers
- Execute the entire move process

HEAR FROM THE JUDGES:

“Overton & Associates, Library Moving Consultants helped us move all of the collections from our main library, which included our Archives & Special Collections. Working with Overton was the easiest part of our renovation process. Bill's expertise and calm presence put us at ease as we planned the move back into our spaces.”

“Fantastic company to work with that truly understands libraries and what it takes to move one. Responsive and efficient. They gave us several options for using volunteers to help with the move and work within our budget and comfort level. I would not hesitate to use them for any future library move.”

AWE Learning

AFTERSCHOOL EDGE™ PLATINUM V2

The AfterSchool Edge™ Platinum (ASE Platinum), for ages 6-12, delivers 85+ award-winning, pre-loaded educational software titles directly on the workstation. With no internet required, the AfterSchool Edge provides the library's elementary-age learners a safe learning environment on a digital platform. All content is STREAM-aligned (Science, Technology, Reading, Engineering, Art and Music, and Math). ASE Platinum is plug-and-play, with little or no interaction from the library staff.

The library staff will be confident that kids are learning and not accessing inappropriate content on the internet, as there is no access to the World Wide Web. Content is delivered on colorful backgrounds with subject-based interfaces for each of the STREAM subject areas. The wide variety of interactive content will keep kids engaged, and most importantly, they will be learning. Educational titles include handwriting (including cursive), e-books (fiction, non-fiction, and poetry),

Library Moving Made Easy!

Our goal is to create a stress-free/anxiety-free library move

Our Library Moving
Services with Over
35 Years of Experience

coding, build-programs, and so much more. ASE Platinum also has the ability to add-on bundles to offer more titles on one workstation.

AfterSchool Edge Platinum is available as an All-In-One Touchscreen desktop hardware with a color-coded or black standard keyboard, AWE Learning mouse pad, and child-friendly mouse or standard black mouse, and a Tablet device.

More information

AWE Learning

BILINGUAL SPANISH EARLY LITERACY STATION PLATINUM V2

The Bilingual Spanish Early Literacy Station Platinum (BLS Platinum), for ages 2-8, offers content in both English and Spanish as well as some dual-language programs. BLS Platinum is perfect for English Language Learners (ELLs) working on improving their English language fluency. BLS Platinum delivers more than 85+ award-winning, pre-loaded educational software titles directly on the workstation. With no internet required, the library can offer their youngest learners a safe learning environment on a digital platform.

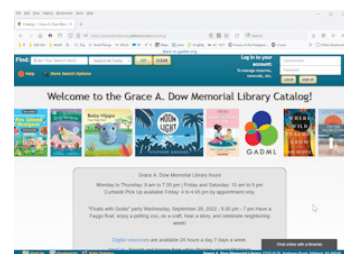

All content is STREAM-aligned (Science, Technology, Reading, Engineering, Art and Music, and Math). BLS Platinum is plug-and-play, eliminating any need to get the IT team involved, and all technical support is handled directly by AWE Learning. Content is delivered on colorful backgrounds with subject-based interfaces for each of the STREAM subject areas. The wide variety of interactive content will keep kids engaged and most importantly, they are learning. Educational titles include handwriting, e-books (fiction and non-fiction), coding, and so much more. BLS Platinum also has the ability for add-on bundles to offer more titles on one workstation.

Bilingual Spanish Literacy Station Platinum is available as All-In-One touchscreen desktop hardware with a colored

keyboard, AWE Learning mouse pad, and child-friendly mouse, also available on a Tablet device.

Biblionix

APOLLO ILS/LSP

The Apollo® ILS/LSP continues to help customers reach new heights. Apollo was designed from the start to be cloud-based in a multi-tenant environment. That's state-of-the-art architecture. As Marshall Breeding stated "Apollo stands apart as a public library system delivered by a modern multi-tenant platform..."

Also in the clouds are Apollo's accolades:

- Product of the Year from Modern Library Awards for 2016 and 2017
- Top of the charts in Breeding's Perceptions surveys for over 10 straight years, to the present
- Modern Library Awards, Platinum Award 2015, 2018, 2019, 2020, 2021, 2022
- An extraordinary customer retention rate of over 99% over 13 years. And half of those who left have come back!

Apollo is solely for public libraries. That's a promise we've made to our customers. There are no schools or colleges that use Apollo.

Groundbreaking capabilities are normal with Apollo, like FlexShare™ ad-hoc resource sharing/consortia and Gabbie® 2-way texting with commands. Then there's Reserve Express®, where patrons subscribe to their favorite authors, media, and series. Plus, a "Kids' Catalog", faceted searching, and SQL querying add to the magic.

Interested libraries begin their exploration of Apollo with a free trial with all of their data; at no cost or commitment. They get to see everything as it will be in a real migration and can still use their current system, unaffected. It's simply the best way to evaluate a new system and side-step surprises.

More information

BookPage

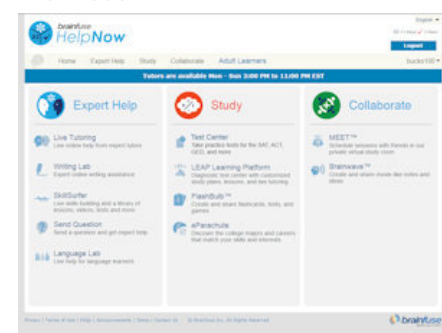

BOOKPAGE

BookPage is a monthly print and digital publication that highlights the best new books in all genres, providing expertly curated reading recommendations and engaging editorial content for libraries to share with patrons. Libraries value BookPage for providing readers advisory, informing book purchasing, and increasing circulation and patron engagement. Subscriptions include access to special tools such as the Advance Title List to assist with ordering, Social Media Content Planner and monthly assets to help promote each issue both in the library and online.

CoLibri System

COLIBRI SYSTEM

Cover and protect all kinds of books in seconds.

The CoLibri System is the fastest and most innovative book covering system in the world. With CoLibri, you can protect both paperback and hardcover books of any size in just 30 seconds! CoLibri's adjustable, soft covers protect books from moisture, scratches, dust and the normal wear and tear for years. CoLibri covers are recyclable, acid free and PAT certified.

CoLibri Eco Covers are the first and only covers that contain "I'm Green Polyethylene." Polyethylene is normally produced from fossil raw material, such as oil or natural gas. I'm Green Polyethylene is a plastic material made from a renewable vegetable raw material: ethanol, which is extracted from sugar cane.

I'm Green Polyethylene guarantees the same characteristics of petrochemical polyethylene in terms of applications, functionality and recyclability, but with a significantly better impact on the environment.

The production of 1kg of regular polyethylene adds to the atmosphere approximately 6kg of CO2. The production of 1kg of I'm Green Polyethylene eliminates from the atmosphere more than 3kg of CO2.

HEAR FROM THE JUDGES:

“We love our Colibri eco covers! The product is easy to use and saves carbon emissions.”

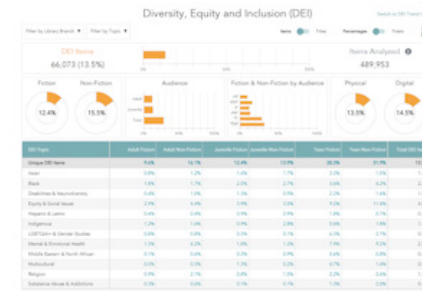

“The Colibri covering system has saved us time and energy. I love it and actually enjoy covering books now.”

collectionHQ

DEI ANALYSIS

collectionHQ is the leading collection performance improvement solution, built on the proven Evidence Based Stock Management (EBSM™) methodology. Simple to use and extremely cost-effective, collectionHQ pairs seamlessly with all Integrated Library Systems. While collectionHQ monitors, improves, and promotes your whole collection the newest addition, the Diversity, Equity, and Inclusion (DEI) Analysis tool, is focused on improving the diverse representation in a collection at both library and branch level.

DEI Analysis provides librarians with an accurate dashboard of information about the diverse nature of the materials in their collection, allowing them to better represent the needs of the community they serve. The DEI Analysis tool was developed with the support of librarians participating in collectionHQ's Customer Innovation Program.

This advanced tool uses a variety of industry accepted DEI topics as touch points, allowing users to measure their collection, libraries can then measure this against external demographic data to ensure they are offering their patrons exactly the content they need.

collectionHQ helps libraries save time, save money, and improve performance. The DEI Analysis tool helps do this in a manner that better reflects the community they serve.

More information

Communico

ATTEND

Elegant, intuitive and customizable program, event and calendar management.

Attend has been built from the ground up to provide everything libraries need for the management and promotion of their programs and events and all controlled by staff from an intuitive cloud-based control panel.

Registered events, series events, and private events are all easily created and managed on the platform with features such as auto waitlists, group registration, custom questions, ILS authentication, and text and email notifications. In addition, Attend also has built in mediation, allowing for programs, events, and content to be approved by Managers and Directors prior to publication.

Upon publishing, the event is added to the event listing and has its own unique webpage dynamically built by the platform, simplifying the process of sharing on social media and other websites. The pages are indexed by search engines, as is the calendar. Virtual and hybrid events are also effortlessly created and managed with our built-in integration with Zoom.

Attend is also fully integrated within Reserve, our room booking and asset management module, making it quick and easy to associate rooms and reserve library assets for programs and avoid double-bookings. Attend is also integrated with the other Communico modules making it easy to promote your programs and events on your website, digital signage, self-serve kiosks, and customer app.

HEAR FROM THE JUDGES:

“Most features are available through the Communico API allowing our library website to take ownership of our online user experience while harnessing the power of Attend's feature rich admin platform.”

“The support team is extremely responsive when there are issues, of which there are few.”

More information

Communico

BROADCAST

Broadcast is Communico's digital signage solution. Broadcast is hardware agnostic, so libraries can utilize a host of cost-effective solutions to display beautiful, customized shows on an unlimited number of screens throughout locations.

Broadcast is fully integrated within the Communico ecosystem, so you can utilize our dynamic widgets to display upcoming events or room bookings down to a branch level and create reusable content that can be simultaneously displayed on your digital signage, website, customer app and self-serve kiosks.

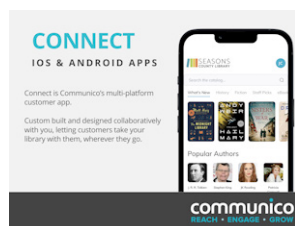

Broadcast also allows you to create “smart shows” which allow you to insert both location specific slides as well as system-wide information all into a single manageable show. The screen knows what location it's in, so library customers are never shown information that isn't relevant. You can insert additional slides into your regular shows with specific start and end dates letting you display content such as special holiday hours without needing to remember to go back

into the Control Panel to remove them.

Creating shows is incredibly easy using Communico's intuitive, user friendly interface and staff can control which users have access to create and modify shows using the granular permission levels.

More information

Communico

CONNECT

Connect is Communico's completely reimagined customer-facing mobile app for iOS and Android. Designed with the end user in mind allowing your customers a smooth, easy to navigate experience packed with new features and accompanied with your own library's unique branding, look, and feel.

Connect fully integrates with your ILS to allow customers to sign up for library cards and browse your entire catalog for both physical and digital content, place holds, checkout items, and, if lending rules allow, renew items. It also includes a self-checkout option so the customer can utilize their own device to check out materials.

Connect is also the only fully integrated library app on the market today that allows customers to download and read eBooks from the major suppliers all within the library's own branded app – removing the need for additional reader apps.

In addition to the ILS, Connect seamlessly integrates with Communico's Attend (event management), Reserve (room management), and Schedule (appointment management) modules providing a single, unified tool for customers to see all of their ILS related items as well as manage their event registrations, room reservations, and upcoming appointments.

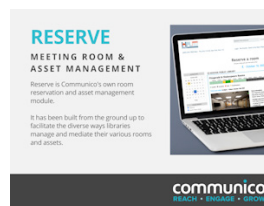

Connect also offers push notifications to customers for transactional reminders such as holds ready for pick up or upcoming reservations and the library can also send global and branch level notifications for incidents such as weather closures.

HEAR FROM THE JUDGES:

“Staff and patrons love the app. Communico staff are quick to respond to questions and find solutions for any issues we have had. Communico is responsive to user feedback and is constantly improving their products.”
“We just launched the Connect app and our patrons love it. As someone who did not use the library app previously, I find myself looking to use this a lot.”

More information

Communico

RESERVE

Easily manage, market, and mediate your library's study and meeting rooms. Reserve is Communico's versatile, elegant and comprehensive solution for room booking and asset management.

Staff can reserve rooms and equipment as they create programs and events and customers can make reservations from your website, customer app, self-serve kiosks, and/or tablets.

Reserve is versatile - you decide the rooms, the hours, and duration both staff and patrons can make reservations for, if you charge, if you want to mediate, and you can also control the number of reservations a user or group can make in a given period.

Our room basket feature allows customers to make multiple room reservations in one booking and receive email and text confirmations as well as reminders. At any time, patrons can view their upcoming reservations online and, if allowed, cancel online.

For staff, access can be very granular and limited to specific branch locations and user levels. Every data point in Reserve is reportable using our customizable report builder. Reserve integrates with Zoom for virtual room reservations, our Broadcast module to create room booking tablets, and with smart locks so patrons may reserve and access rooms without needing staff assistance.

HEAR FROM THE JUDGES:

“Reserve is the second room reservation product we've made available to the public and both staff and patrons are very happy with Reserve. Communico provides excellent customer service, is responsive to feedback, and is constantly improving their products.”
“Reserve is a truly excellent product. The support team at Communico is exceptional in the quality and timeliness of customer service they provide, as well.”

More information

Communico

SCHEDULE

Schedule is Communico's appointment management module. Created during the pandemic, seemingly overnight, to aid all public libraries, partner or not, with their dramatic shift in workflows. After receiving feedback from users, we expanded Schedule into what is today an incredibly robust appointment management tool.

Schedule saves valuable staff time by allowing customers to schedule a host of appointments. For example: Curbside Pick-up, MakerSpace stations, Notary and Passport appointments, computer stations, social worker and tax assistance appointments, one-to-one assistance in areas like genealogy, tech help, and tutoring - all with the flexibility for both in-person and virtual options. When you think of using Schedule to book a person, place, or thing the possibilities become endless.

In addition to allowing library staff to create an unlimited amount of appointment categories, Schedule includes amazing configurable features such as Zoom and ILS integration, booking limitations, custom questions, flexible appointment slots, calendar exceptions, and, coming soon, mediation and email calendar integration all on a landing page that matches the library's website exactly.

HEAR FROM THE JUDGES:

“Communico is responsive and actively seeks feedback. It is the best product of its kind offered to public libraries. I recommend it often to other libraries and we just renewed for an additional three years.”
“Schedule has been an excellent product for us, filling the specific need we have for appointment-based services. It's flexible and customizable, allowing us to use it for multiple services we offer. Communico support staff is truly exceptional. Their customer service is consistently thorough and timely.”

COMPanion Corporation

ALEXANDRIA®

Alexandria® Library Automation builds and promotes library advocacy, making your library the heart of the learning experience by focusing on 4 key areas: Equitable Access, Discoverability & Engagement, 3rd-Party Integrations, and Adoption & Support. This exclusive solution puts more resources in your students' hands, delivers a true one-size-fits-me experience, increases engagement and circulation, and puts more time in your hands to focus on what matters most, improving student outcomes.

Alexandria® is more than just library circulation software. It is a tool that helps connect educators to students, and students to curriculum. Alexandria will maximize the investment you have made in your collection in the following ways:

- Equitable Access & Delivery – all patrons have equal access to the

resources your library has to offer; regardless of age, ability, learning style, technology limitations, etc.

- Engagement & Discoverability – tools and interfaces designed to help patrons of all ages and grade levels discover what they need.
- Partnerships & Integrations – connect various EdTech solutions to save time and leverage resources.
- Adoption & Success Fidelity – our commitment to your success is apparent in all of the resources we provide from monthly webinars to our 24/7 live customer support.

Your library will feel truly limitless!

Comprise Technologies

SMART ACCESS MANAGER (SAM)

Smart Access Manager (SAM) has been a cornerstone solution for libraries managing public-access computers for over 25 years. SAM's fully integrated and comprehensive functionality offers the necessary tools to empower patrons while liberating library staff. SAM works in the background and offers library staff a configurable and efficient way to manage PCs for time and print. It also enables PC web reservation and boasts an easy print release /cost management solution. SAM's new welcome screen supports library event announcements while at the same time connecting patrons to resources, and other community engagements. Look for the new integrated link to SmartPAY on-line as well, which means additional

points of payment for patrons. SAM offers all of this in multiple languages as well. SAM's web-based architecture supports centralized management for a spectrum of library settings. SAM converts all print jobs to PDF format, eliminating dependence on local print drivers and enables patrons to preview before printing. SAM also supports multiple payment options. Choose from SAM's account-based system utilizing patrons' existing library card numbers. Pair this up with a Smart Kiosk payment center or have SAM support free printing with daily page limits. SAM is an easy-to-use solution for public PC management.

Comprise Technologies

SMART KIOSK

Smart Kiosk payment centers have become an essential self-service option being implemented to move money handling away from staff. Smart Kiosks offer all payments and services, such as, PC sign-up, ILS-related payments, and printing from library PCs and patron-owned mobile devices. Patrons can manage their accounts, purchase merchandise, pay for copies, faxes, scan/print, pay fines and fees, and make donations. Every payment made without staff involvement yields true cost savings and allows for social distancing at the same time. Self-service Smart Kiosks are an easy and convenient way to accept and manage payments for services and goods offered in the library. Smart Kiosks integrate fully with Smart Terminal credit card readers so libraries

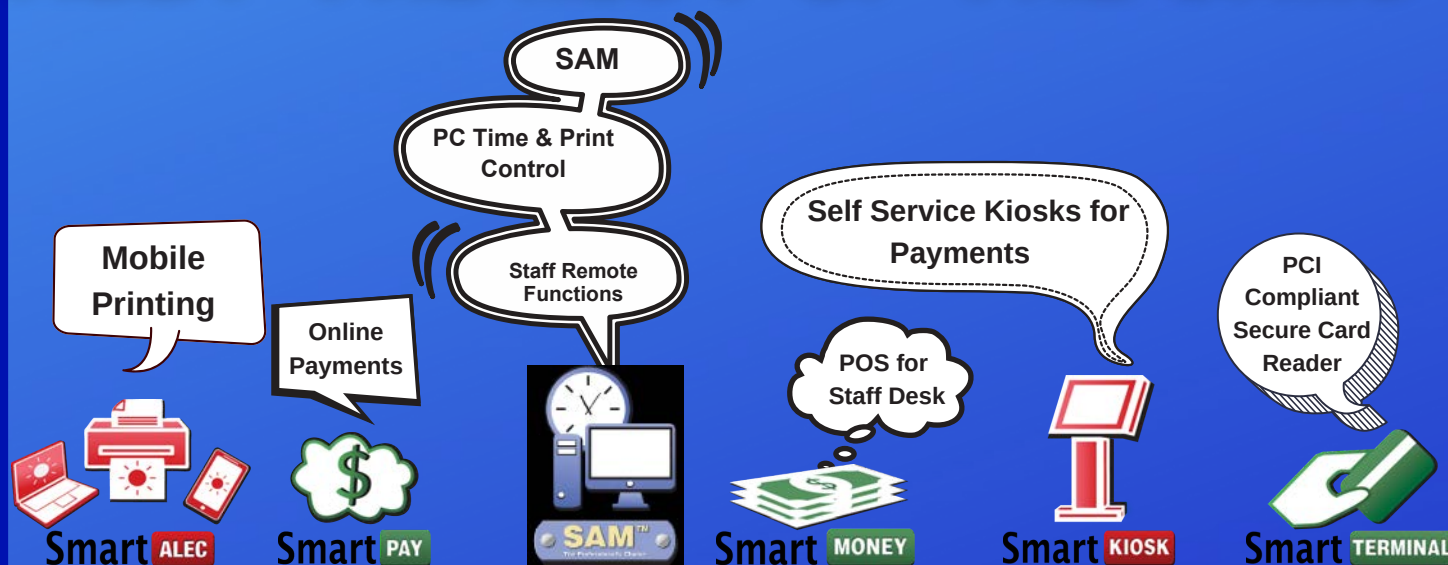

SMART ACCESS MANAGER

Smart Access Manager, better known as **SAM**, is a fully customizable PC, time & print management system for your patrons & guests. Over 20 years on the market & only the best functions & features to show for it!

Customize color and themes, staff chat options with patrons, staff can control the PC queue & print jobs from the desk print preview and flex time for patrons, and so much more!

can offer patrons payment card service. Smart Kiosks meet the Payment Card Industry Data Security Standard.

More information

Comprise Technologies

SMART MONEY MANAGER

Smart Money Manager is a complete, fully integrated point-of-sale (POS) cashiering system for financial transactions specific to a library environment. It recognizes patron accounts and links with leading ILS software to check, display, and post payments for fine/fee transactions or other charges. The ILS integrated feature eliminates dual entry, reduces errors, and in doing so, saves staff time. Top it off with accurate reports. Smart Money Manager processes cash, check, or payment card transactions as well as refunds. It displays a list of ILS fees, library merchandise, rentals, or other charges that can be paid through an easy-to-use interface. In addition, Smart Money Manager offers fine/fee waiver capabilities along with the ability to pay multiple family members' fines in a single transaction. All transactions are recorded in our financial database as well as updated in the patron record real-time. We offer compatible point-of-sale hardware, but our solution can run on your existing service desk PCs as well. No longer do you need standalone cash registers when you have the Smart Money Manager POS system along with Smart Terminal's patron facing credit card system, offering safe contactless payments. Smart Money Manager with Smart Terminal credit card reader meet the Payment Card Industry's Data Security Standard.

CROWLEY DIGITIZATION SERVICES

Digital resources have become an even more pivotal necessity for libraries and educational communities. For more than 40 years, The Crowley Company has served the imaging needs of librarians and archivists by preserving and capturing legal documents, genealogy research, photos, newspapers, maps, books, microfilm, and other still media.

Crowley's Digitization Services team has been helping libraries keep their communities digitally connected to valuable still media research and special collection materials through high-quality, efficient customizable scanning services. This has attributed to increasing the preservation of still media and public or private access to digital images.

Crowley is the only firm in the industry that manufactures, distributes, and uses its scanners in-house and supports them globally. This unique ability to embrace the full life cycle of digitization services allows the Crowley team of professionals to understand, accept, adapt, foresee, and react to any collection digitization challenge.

For digitization projects requiring image quality expertise, diverse media knowledge, and production efficiency, Crowley's Digitization Services division offers the customized digital capture of archives and records at our facility or at the on-site location. Whatever the media, scan need, or capture challenge, Crowley makes digitization convenient for you.

HEAR FROM THE JUDGES:

“Crowley is easy to work with. They are very flexible as far as types and timing of projects. They've also been very helpful in referring us to other companies when a particular set of materials is not in their wheelhouse.”

The Crowley Company

CROWLEY USCAN+ HD UNIVERSAL FILM SCANNER

Fast, accurate research tools rule the library world. The Crowley UScan+ HD Universal Film Scanner has an intuitive design and multi-use functionality of four separate scanners in one, offering the ability to scan microfilm, microfiche, aperture cards and film negatives.

Ideal for libraries, museums, universities corporate archives and other organizations, the UScan+ HD offers patrons ease of use, high image quality and an efficient option to view, capture, save and send images from multiple media collections.

To accommodate a wide range of patron needs for microform scanning, it also has an adjustable roller that guides and secures to protect the film, the scanner learns favorite focus and zoom positions to speed up image access and includes a one-click instant capture to save image frames. The UScan+HD also includes a RapidScan software option to automatically advance the film and capture frames as the film passes over the camera for batch scanning.

MEKEL MACH-SERIES MICROFILM SCANNERS

Starting with the world's first production-level microfilm scanner in 1981, Mekel Technology has led the micrographics digitization field for thirty-three years. Manufactured by The Crowley Company.

ScanPro All-In-One

Scan it. Save it. Retrieve it.

Everything your film needs in one desktop solution.

www.e-imagedata.com
800-251-2261

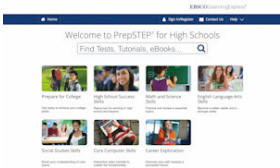

ny, the Mekel MACH-Series Microfilm Scanners - which include the MACH5, MACH10, MACH12 - have become the industry standard for microfilm capture in libraries, archives and other recordkeeping institutions around the world.

The Mekel MACH-Series scanners offer high-performance microfilm scanning with enhanced features such as scanning speeds up to 1600 images per minute, vertically aligned film transport for enhanced stability, superior image quality (including 3-star FADGI capability), high-speed rewind and up to 750 dpi true optical resolution for optimal production.

Ideal for libraries and archives, the Mekel's operate using QuantumScan and QuantumProcess software which ensures fast and accurate image capture and easy editing, eliminating the need for rescans and simplifying the digitization process from job set-up to final image output.

EBSCO LEARNINGEXPRESS PREPSTEP® FOR HIGH SCHOOLS

Whether they are planning to attend college, join the military or enter the workforce, students can achieve their

goals using PrepSTEP for High Schools. This comprehensive, e-learning platform features seven targeted learning centers containing practice tests, self-directed tutorials and microlearning lessons, e-books, articles and flashcards. These tools are designed to help students improve core academic skills (English, math, science and social studies); score higher on ACT®, SAT® and AP® exams; acquire basic computer skills; search for colleges and scholarships; explore careers; and prepare for the ASVAB (military) and occupational certification exams. PrepSTEP for High Schools also includes tutorials to help students develop organizational strategies, information literacy, and other important study skills. In addition, educators can use these learning resources to support instruction in a wide range of subject areas. PrepSTEP for High Schools comes in Common Core, Non-Common Core and Canadian versions and is compatible with Blackboard, Canvas, Schoology and Brightspace learning management systems.

FLIPSTER

Flipster is a digital magazine platform

that allows people to browse the latest issues of popular magazines, from any location, courtesy of the library. Flipster offers an easy, browse-able reading experience for people of all ages and experience levels. Users can browse magazines by category as well as perform searches for specific publications. The table of contents contains links for quick access to articles of interest and links from advertisements and articles within magazines are hyperlinked, opening in separate tabs when clicked. In addition, there is an option to zoom in and out for better readability.

Over the past year the Flipster product team has made great strides in accessibility with the goal of providing a superior digital magazine reading experience to all readers. Flipster has received an improved VPAT score, making it easier for libraries to evaluate the platform. And a new and improved desktop reader has been released that allows users to navigate using a keyboard with improved compatibility with screen readers.

Flipster digital magazines are accessible from school, home, work or on the go and can easily be downloaded for offline reading using the enhanced Flipster iOS and Android apps available through Google Play and iTunes. App users can easily locate libraries nearby by enabling geolocation or searching by library name, postal code, city or state.

e-ImageData Corp

SCANPRO® ALL-IN-ONE™

e-ImageData's ScanPro® All-In-One™ microfilm scanner is the latest and only desktop scanner of its kind to hit the micrographics market by storm. With the All-In-One, users are able to convert entire microfilm collections and perform on-demand research all within one small unit – and for an affordable price.

The All-In-One scanners are built on the ScanPro platform first developed in 2006 and have been continually improved since then. Today, these microfilm scanners are fast, and have features and capabilities not found on any other microfilm equipment. Patrons have named features like the “magic button” and the “must-have feature” for making working with microfilm enjoyable and fun. Names reflect patron appreciation for the continual effort to revolutionize the way people work with microfilm.

The All-In-One offers an exclusive yearly software membership that allows users advanced software features like AU-TO-Scan™ Pro that scans up to 100 images per minute, the ability to automatically adjust each scan for proper brightness producing the best image quality in the industry, the ability to save scans in many file formats and OCR while scanning and linking directly to a database for information lookups. Being a member grants one full access to new features, performance enhancements and a continuous product warranty – making ScanPro the only scanner customers will ever have to buy.

Fiero Learning

FIERO CODE

Around the world, there is a growing awareness that public libraries, at their core, are about more than book collec-

tions. With an ongoing effort to bring opportunity to patrons, community learning, education, and programs are more emphasized in the modern library's services than ever.

Coding, STEM/STEAM are among the highest desired areas of education for the simple fact that learning to code has an outsized impact on people in the form of high-paying jobs and life-skills such as problem solving and critical thinking.

The problem is that these types of experiences are hard, if not impossible, for the average public library to pull off. They generally lack the expertise to feel comfortable teaching computer programming, nor do they have the capacity to prepare for coding lessons.

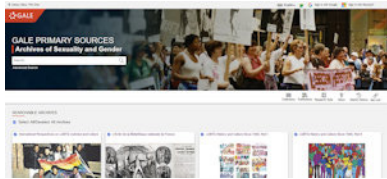

This is where Fiero Code comes into the equation. We partner with public and K-12 school libraries to help them bring coding to their communities in sustainable ways. We do that in three main ways:

- We provide a fun, engaging, and gamified learn-to-code software that libraries offer as a digital resource to enable self-guided learning.
- We provide training and support so any staff member can start and run in-person code clubs or code classes - no coding expertise required!
- We run quarterly coding competitions / hackathons to drive engagement, usage, and learning outcomes.

With our help, libraries around the world are reaching people with coding education.

ARCHIVES OF SEXUALITY AND GENDER

The Archives of Sexuality and Gender is the largest digital primary source program for the historical study of sex, sexuality, and gender. From 18 institutional partners we have digitized 83 unique collections, nearly 7 million pages of material across 5 archives. You will find personal papers, organizational papers, manuscripts, more than 8,000 books,

more than 2,000 periodicals, photographs, ephemera, and more.

The heart of the Archives of Sexuality and Gender program is the Gale Primary Sources (GPS) software platform. It incorporates Basic and Advanced search options, innovative tools such as Term Clusters and Term Frequency, downloadable optical character recognition (OCR) text, digital humanities support, Zotero compatibility, and the ability to save items to personal Google Drive and Microsoft OneDrive accounts.

We have worked closely with our partners to digitize a wide range of materials in over 30 languages from more than 45 countries. This wealth of materials provides historical breadth and depth, a way to preserve the past, a cultural narrative, diversity and inclusivity, and greater awareness of marginalized groups. The history you find inside the materials, the narratives you read, the experiences you uncover tell the story of the human experience and ultimately, that is what Gale and its partners intend with the Archives of Sexuality and Gender.

Gale, part of Cengage Group

GALE PRESENTS: EXCEL ADULT HIGH SCHOOL

Gale Presents: Excel Adult High School is a 21.5-credit online high school completion program that allows public libraries

to offer accredited high school diplomas to adults who wish to prepare for entry into the workforce, further their careers, or attend college.

The curriculum is aligned to national standards and offers more than 100 core academic, elective, and college-level courses. The intuitive online platform offers 24/7 access, allowing adult students to fit their studies into a busy, work/life schedule.

The program is self-paced and can be completed in 24 months or less. Students can transfer previously earned high school, GED®, HiSET®, or TASC credits to graduate sooner. Learners receive ongoing support from instructors and success coaches and access to the school's unlimited, online tutoring program.

For non-native English speakers, there are built-in translation and read-aloud tools. Course content, quizzes, and exams can be translated into more than 135 languages. Learners interested in pursuing college can get a jump start by taking up to seven ACE (American Council on Education) courses, earning as many as 21 free college credits.

Excel High School is accredited by Cognia, the parent organization for the North Central Association Commission on Accreditation and School Improvement (NCA CASI), Northwest Accreditation Commission (NWAC), and the Southern Association of Colleges and Schools Council on Accreditation and School Improvement (SACS CASI).

HEAR FROM THE JUDGES:

"I want to make sure I share just how absolutely fulfilling it is to offer this program to our patrons. When interviewing patrons for scholarships, you learn about all of the challenges and barriers they faced trying to get their high school diplomas. It is humbling to be a part of their journey and to witness them in their caps and gowns at the graduation ceremony. This program is an investment that pays dividends beyond what we put into it via funding or managing the program. Furthermore, managing the program is easy because of the amazing support team at Gale. I guess I am a bit biased toward this program because I have witnessed the joy of our graduates and it is remarkable."

IT'S HIGH SCHOOL, BUT FOR **ADULTS**

Your library can change lives by providing the opportunity to earn an accredited high school diploma through a self-paced, supportive, 100% online education program, *Gale Presents: Excel Adult High School*.

WHY IT WORKS FOR ADULT LEARNERS

Ongoing Support—Instructors, success coaches, and tutors dedicated to helping students achieve their goals.

English Language Learner (ELL) Friendly—All class sessions offer built-in ELL tools to give non-native English speakers access to courses in other languages.

Unlimited Online Tutoring—Live, built-in student tutoring through the Train the Brain program.

Up to 21 College Credits Free—College-level ACE (American Council on Education) courses available.

Transfer Credits Accepted—Students can earn credit for courses completed at other accredited high schools, homeschools, or successfully passed portions of the GED® or HiSET®.

WHY IT WORKS FOR PUBLIC LIBRARIES

Built-In Qualification Process—Program workflow helps qualify a student for a scholarship award. It includes an application, prerequisite course, library interview, and 30-day scholarship probation.

Program Management—Intuitive, real-time dashboard and reports help track student progress and outcomes.

Onboard Training and Support—Program implementation assistance and staff training. Libraries also receive student recruitment and marketing support.

Proven Outcomes—Libraries across the U.S. have graduated adults, helping them reach a brighter future.

“This has been one of the most impactful platforms/resources we’ve ever offered to our customers. It truly changes their lives- their earning potential, career choices, and their self-confidence. The program is well designed, and internal customer service is outstanding.” — 2023 Modern Library Awards Judge

expanded spacing between words and one third more spacing between lines. This forces the eye to move more slowly, reducing tracking errors and improving reading fluency.

Fewer words per page can help readers focus and further comprehension. Plus, they can turn the page faster, increasing feelings of accomplishment and reducing anxiety. A 2019 Project Tomorrow efficacy study found that youth large print books improved students’ reading skills and mindsets:

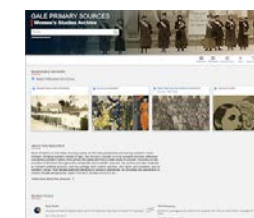

- 69% of striving readers said they enjoyed reading the large print text more than any other class books during the school year.
- 61% of elementary school students said they remembered characters and plots better when reading large print books.
- 48% of high school students said they read more outside of school after experiencing large print books.
- 67% of teachers noted that large print text reduced stress and anxiety in students reading below grade level and at grade level.
- 62% of teachers reported faster acquisition of the English language when ELL students read large print books.
- 68% of teachers reported greater engagement in reading activities among special education students.
- 3 in 4 teachers said students reading below grade level demonstrated increased reading comprehension and retention.

HEAR FROM THE JUDGES:

“Thorndike has been amazing to work with and my students adore their large print books. The books have made such a difference with all of my students, and I’m thrilled to be able to offer them this format.”

More information

Gale, part of Cengage Group

WOMEN'S STUDIES ARCHIVE

Women's Studies Archive is a database of primary sources from 19th, 20th and 21st centuries examining social, political and professional aspects of women's lives. Coverage includes activism; crime; health & mental health; labor; law; leadership; medicine; peace studies; philanthropy; Planned Parenthood/birth control; publishing; second wave feminism; suffrage & suffragettes; women's rights movement and more.

- **Racial Minorities:** Provides a diverse, global perspective on women's history and increased representation of minority groups. Part 2 hosts collections from California Ethnic and Multicultural Archives at UC Santa Barbara concerning Latin American/Hispanic women. Part 4 spotlights the African American female experience with collections from Amistad Research Center, Schomburg Center for Research in Black Culture and Smithsonian Institution.
- **Author Gender Limiter:** Limiting by gender not only makes women's writing more discoverable but facilitates analysis of women's authorship as researchers can track development of language, literature, and ideas.
- **Supports Feminist Digital Humanities:** Part 3 offers unique opportunities as it forms a data set with clear definition and boundaries. By providing exclusively female-authored works, it enables scholarship into feminist theories through text data mining and exploration of feminism in theoretical, fictional, and philosophical discourse.

LIBRARYCALL DIAL-A-STORY

The Galecia Group's LibraryCall Dial-a-Story is a uniquely designed phone-based service to help libraries reach more people and address challenges like unreliable internet service and inadequate funding for hours, staff, and programs.

We offer three affordable options: Storytime Direct, Dial-A-Story Studio, and Soundtrack.

Storytime Direct includes a local phone number that delivers a weekly story in English and Spanish. Stories are a mix of classic and original content by diverse storytellers.

Dial-A-Story Studio provides an interface for libraries to record, store, and schedule stories they create. They also have access to our growing collection of diverse, multilingual stories.

Our web widget, available for both services, allows customers to share their stories on their library websites making the services truly available to everyone.

Soundtrack, our newest option, is used to provide audio to a range of activities from exhibits to Storywalks®. We provide a local number for patrons to call and listen to recordings by library staff that accompany library exhibits. This service helps address issues of accessibility and literacy.

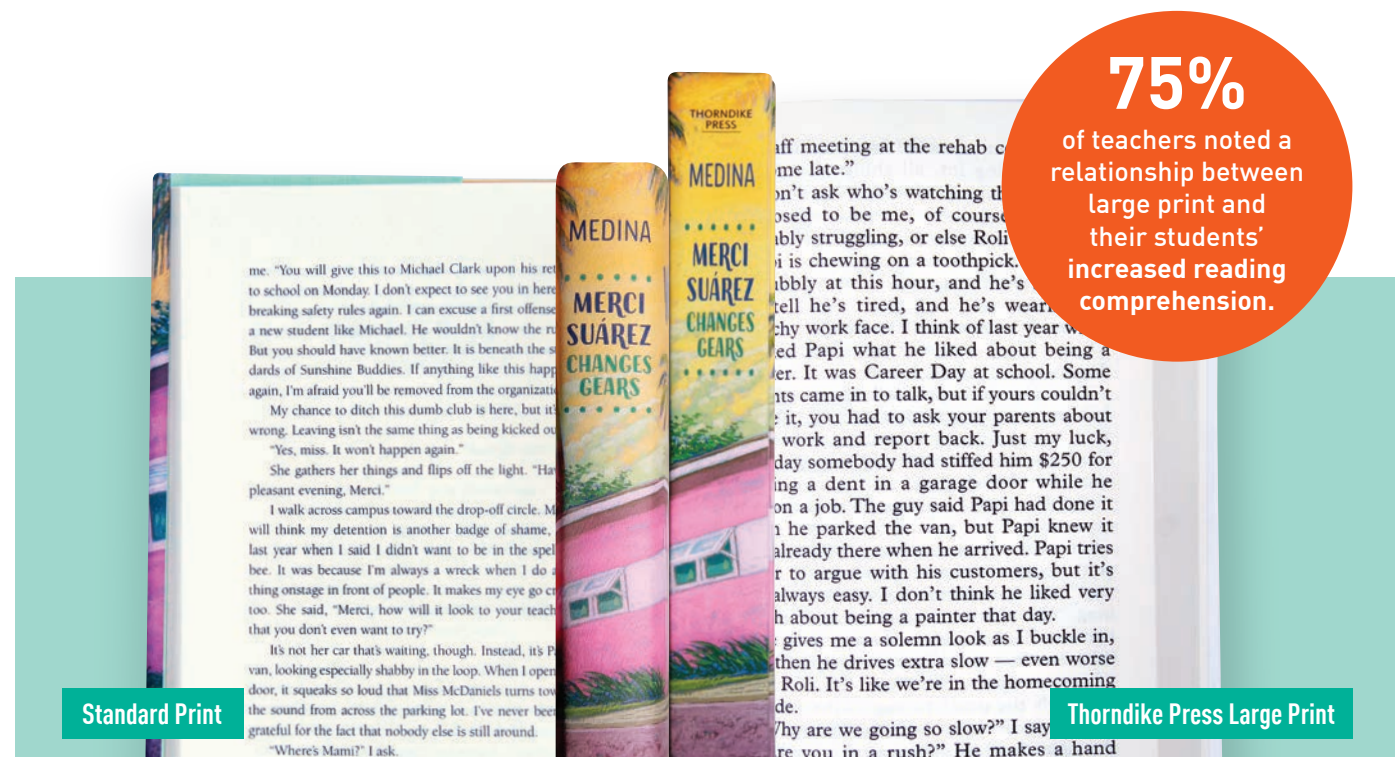

The LibraryCall management app allows libraries to upload audio, schedule recordings, track usage, and manage their callers' experience. We take pride in supporting our customers by offering dedicated email discussion lists, workshops and meet-ups, and a friendly company culture that values and responds to feedback.

TODAY'S SCIENCE

Today's Science spans important advances in core science disciplines using easy-to-understand, engaging language. This unique resource includes exclusive, proprietary content by scientists and science journalists—based on the most current peer-reviewed journals—which emphasizes science accessibility and application.

Features include:

- Original Articles: distilled from major scientific news sources and peer-reviewed journals, highlighting current science topics in easy-to-understand language. Each article includes Discussion questions designed to encourage critical thinking; in-text pop-up glossary, puts science terms at students' fingertips, promoting science literacy; abstract from the original article, many with links to the original; bibliography with links; keywords; related content for continued inquiry and study.

- Conversations With Scientists, an original and unique feature, provides exclusive and insightful first-person accounts of breakthroughs from practicing scientists at leading institutions around the globe. An excellent source for papers, inspiration, and career guidance, they also serve as primary source documents.
- Supporting Resources: video briefs, editorial cartoons, images, diagrams, and exclusive crossword puzzles created specifically for featured articles.
- Need a Research Topic?: summaries of topics to jump-start research; plus, a hyperlinked Topic Index.
- Research Tools: guidance on writing papers, using primary sources, and more.
- Dynamic citations.

HEAR FROM THE JUDGES:

 "We have received overwhelmingly positive feedback from librarians and teachers after adding Infobase's Science Online and Today's Science to our statewide resource collection. The platforms are easy to navigate, and the content fills the previously unmet need for high quality science resources."

Innovative, part of Clarivate

INNOVATIVE RESOURCE SHARING (INN-REACH)

For 30 years, INN-Reach has provided libraries with a cost-effective resource-sharing solution that includes an easy-to-use discovery experience for patrons and automated workflows for library staff.

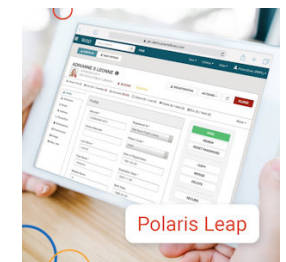

Innovative completed testing and certifications for Alma by Ex Libris and Koha supported by ByWater Solutions for the Direct-to-INN-Reach (D2IR) integration, making it easier for new libraries to join INN-Reach resource sharing networks. Additionally, INN-Reach items now display in patron accounts inside Vega Discover.

By joining a resource sharing network, patrons are instantly connected to millions of new titles without the library investing in new materials. These resources are displayed in a shared discovery interface for an intuitive process that enhances the patron experience. Users simply search the catalog, and easily check-out or place holds on materials—without any additional work by library staff. Patrons, students, and faculty receive physical materials in as little as two days, and electronic materials almost immediately.

This patron-initiated consortial borrowing system makes lending and borrowing materials between libraries as easy as processing local hold requests. Libraries who join see an increase in their circulation as a result of the expanded collection and easy-to-use shared catalog. Best of all, participating libraries see their shared resource expenses reduced by 70%.

POLARIS LEAP WEB APP

Empower library staff and connect with your patrons wherever they are with Polaris Leap. This responsive web interface brings the power and functionality of the Polaris ILS to library staff through a browser for Public Services, cataloging, and Technical Services. Polaris Leap can be used on a desktop, a notebook, or a tablet, freeing staff to connect with patrons and complete tasks wherever it is most convenient – in the stacks, at community events, or even working from home.

The Polaris Leap web application allows staff to get out from behind the desk and still have access to necessary data and functionality with flexible, intuitive workflows.

Functionality includes:

- Check outs, check ins, and renewals
- Offline circulation
- Serials Check In
- Patron registration, including patron photo

- Patron account management including claims, reading history, patron associations & more
- Fine payment with eCommerce integration
- Support for outreach services
- Picklist processing
- Hold request management
- Direct integration with Innovative INN-Reach
- Personalized search results display
- Printing, including receipts, holds pickup, in-transit slips and print notices
- Import bibliographic and authority records
- Item record management, including create, copy, delete, and bulk change
- Manage bibliographic, authority, item, and patron record sets through create, view, modify, or delete the record set (list) or apply bulk actions

Janice Davis Design LLC

CUSTOM DESIGN SERVICES FOR CHILDREN'S AND TEEN LIBRARIES

We at Janice Davis Design create magical spaces where children can come to read, write, work on a computer, watch a DVD, join in an activity, or just share time with their parents or caregivers.

Children are enchanted and drawn to our whimsical custom-designed décor elements, and yet we are ever-mindful that a library and not a playground -- these are spaces that delight but still provide the proper atmosphere for reading, study, and focused activity. Decorative elements might include fanciful room entrances, reading nooks, play spaces, puppet theaters, shelving end caps, wall décor and signage, taking into account each library's needs, themes and coordinating with existing room décor.

Most often we redesign existing spaces where an imaginative updating is wanted. In the case of new buildings or complete renovations, we work hand-in-hand with the library's architects to put the “icing on the cake” with an activity castle, pirate ship reading nook, book-lad-

en choo choo train, video viewing cave or any other manner of functional delight.

Truly, no budget is too large or too small! Imagination does not have to come with a high price tag -- there's always something special that can be done on any budget.

Our clients love working with us -- collaboration is the key! Please see the stellar reviews quoted on our website.

HEAR FROM THE JUDGES:

“It was an absolute delight working with Janice Davis Design. The process from design to completion was painless with Janice at the helm. Ms. Davis transformed our Children's Library to a place of wonder and whimsy. Her artistic vision and expertise to execute an amazing design was a pleasure to be a part of. Our patrons are thrilled with the transformation of our space. Janice brought life and wonder to our library and we are forever grateful.”

LEID Products

SMARTAXESS™ ELECTRONIC LIBRARY LOCKER SYSTEMS

SmartAxess™ Electronic Library Locker Systems, powered by LEID Products, enable libraries of all sizes to provide uninterrupted 24/7 “no touch” service outdoors or in with a variety of fully ADA Compliant sizes and configurations.

Patrons can retrieve their requested library books by simply passing a library card under the bar code reader. The

system recognizes the patron and automatically opens the correct locker door or doors revealing books and materials. Patrons can also enter their library card number or transaction code on the 10” LCD screen via finger touch or by using the corner of a plastic card, pen, pencil, or other device. Once materials are retrieved, the system sends a message to staff that the locker is now available for new materials and another patron.

SmartAxess Electronic Library Lockers can be configured in both number and size of lockers to meet the specific requirements of a library’s remote locations and come in pass-thru (built into the library) or non pass-thru (remote) designs. All systems feature 24-inch ground clearance for accessibility and weather implications and have the lowest 5-year cost of ownership in the industry.

Benefits include:

- ADA Compliance with 24” ground clearance
- Easy to clean and keep sanitized for patrons and library staff
- Robustly designed, engineered, and built completely in the USA
- Proven and reliable for outdoor installation
- Affordable
- Lowest 5-year cost of ownership in the industry
- No annual software fees

Mackin

MACKIN'S ACCESSIT LIBRARY

Mackin's Accessit Library is an exciting, forward-thinking library management system that is fast becoming the alternative to what many schools find themselves having used for countless years.

Librarians and teachers will marvel at the power, flexibility, and seemingly endless array of options for customization that Mackin's Accessit Library provides. A revolutionary library automation system, Mackin's Accessit Library delivers easy and precise access to a school's or district's library catalog and creates an environment where the library becomes the trusted hub that connects and integrates

a school's existing systems.

Employing Mackin's Accessit Library allows you to streamline your workflows while offering an unmatched level of connectivity, visibility, and flexibility. Adoption of this revolutionary system delivers a complete school-wide resource management tool that helps you simplify and automate your day-to-day tasks. Paired with MackinVIA, the versatile, multiple-award-winning digital content management system, this seamless combination creates a nimble and powerful resource for your educators and students alike.

More information

Mackin

MACKINVIA

MackinVIA is a free, multiple-award-winning digital content management system created to provide schools with easy access to their collection of eBooks, audiobooks, read-alongs, databases, websites, and videos. Accessible by more than 9 million students worldwide, students, teachers, librarians, and admins use a single login, to view, utilize, and manage all the school's digital resources on any desktop, laptop, or mobile device. Available for all devices and platforms, MackinVIA is the ideal tool for today's in-class or remote learning options.

MackinVIA provides access to nearly 3 million digital resources in a variety of formats. eBooks are available in a traditional format and with the added ability to host EPUB3 fixed-format. Interactive eBooks integrate video, audio, animation, and activities with the text to enrich the learning experience. MackinVIA also features professionally read Mackin Read-Alongs™ and educational databases vetted to allow students to safely conduct research without the threat of inappropriate material or ads. Deep Discovery Search has been integrated allowing users to search the contents inside their MackinVIA and return split-second results for words or topic.

MackinVIA features a student-friendly interface and a growing list of cutting-edge features. Included is the ability

to integrate Mackin's Accessit Library, a forward thinking, customizable and robust alternative to other library automation tools.

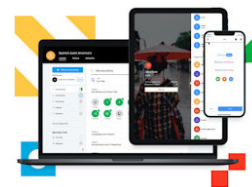

HEAR FROM THE JUDGES:

“I initially chose MackinVIA over other ebook readers because the formatting made the books easier to read than on other platforms especially when using a laptop or other screen which use landscape rather than portrait formatting unlike print books. Platforms which just use a pdf scan of the print book can make it hard for students to navigate the text.”

“How fortunate our libraries were that we had MackinVIA pre-lockdown because we were able to keep our students reading and learning during lockdown, hybrid schedules, and beyond. The platform is easy for students at all levels to use, it's attractive and engaging, and functions smoothly, even on the admin end to retrieve statistics and other data. MackinVIA is a popular and robust component of our library media center offerings to students and staff.”

NoveList

LIBRARYAWARE

LibraryAware from NoveList offers professionally designed templates to help libraries connect with readers and keep them engaged. Use a template as-is or customize it with the millions of images, graphics, book jackets, and DVD covers included in every account. From social media posts, e-blasts, book lists, and bookmarks, to flyers, posters, shelf talkers, and digital screen graphics, LibraryAware makes it easy for libraries of any size to promote their programs, services, and collection.

Looking for one solution for your entire staff? LibraryAware has no limits on the number of account holders, email subscribers, or sends. Want to send targeted emails? Create unlimited subscriber interest groups so patrons can sign up

for the emails that match their interests. Our metrics show what your patrons are opening, clicking, following, and reading — so you can measure what works.

NextReads newsletters are included in every subscription covering 24 topics and genres. They save staff time and help build connections to readers. The curated lists include award-winning, hand-written annotations from the book experts at NoveList. Featured titles automatically link to the library’s catalog so readers can get more information or place a hold. Newsletters can easily be changed into website content like an embedded booklist or book carousel that automatically updates when a new list comes out.

ScannX, Inc.

ZEUTSCHEL OS 15000 OVERHEAD BOOK SCANNER POWERED BY SCANNX SOFTWARE

The Zeutschel OS 15000 Comfort overhead scanner, powered by ScannX Professional Edition software, is a powerful A3+, true 600 dpi resolution, color, digitization

tool recognized for its ease of use, image quality, advanced capabilities, book friendly scanning, security, and accessibility. Scan modern as well as historical books, manuscripts, magazines, science reports, contracts, or other cultural heritage. Powered by ScannX software, it is easy to install, maintain, and monitor.

The company's new Book ScanCenter 6.0 software represents a new industry standard in security and features. New features include scanning from left-to-right and right-to-left; single scan conversion to dual file formats (TIFF and searchable PDF) and integration with Microsoft Edge for unmatched security in scanning to the cloud.

Not only can you scan to the cloud, email, USB, and mobile device (among others) in PDF, searchable PDF and Word docx file formats, now you can also print from the cloud and from USB drive. ScannX also offers faxing, and translation services.

The OS 15000 Comfort design allows the book to lie face up and captures the full image of the page without distortion with the integrated book cradle protecting the spine of the book from damage while scanning. The OS 15000 can automatically crop, orient, and straighten

each individual page, while removing your thumbs from the final image if you need to hold the book down.

HEAR FROM THE JUDGES:

“As a patron facing scanner, the OS15000 is unparalleled. The scanner is easy to use, incorporates OCR during the scan process, removes thumbs and other extraneous content on the fly, and is very easy for patrons to figure out. The support is also amazing - we usually can have most issues addressed within one day through remote support.”

EUROPA WORLD

Europa World is a meticulously researched global resource. It provides political, economic, and statistical information on over 250 countries, territories, and also on international and regional organizations. The Europa World Year Book was first published in 1926 and, together with nine Regional Surveys of the World, is renowned as one of the world's leading reference works.

- Authoritative information on every country, providing context for the world's major political and economic developments.
- Up-to-date government lists and recent election results for every country in the world.
- The ability to directly compare national statistics in graph and tabular form.
- Coverage of 2,000+ international organizations, commissions, and specialized bodies.
- Topical essays and commodity overviews for major regions of the world.
- Current and comprehensive statistical and directory data for all countries and territories.
- Impartial coverage of issues of national and regional importance from acknowledged experts.
- A directory of major political figures with biographical information and facts.
- Sophisticated search and browse functions allowing enhanced accessibility to data-rich content.
- Access via institutional IP and EZproxy. Access using Shibboleth and OpenAthens are coming soon.

HEAR FROM THE JUDGES:

"The latest release of Europa World is a big improvement on the previous version. Access off-campus is now much easier and within sections drop-down headings have been added, enabling students to jump to information of interest much more quickly. I highly recommend this to anyone needing information about countries or regions of the world."

TCP Software

SCHEDULEANYWHERE BY TCP SOFTWARE

ScheduleAnywhere Streamlines Library Staff Scheduling

ScheduleAnywhere online employee scheduling software allows libraries and library systems to create an unlimited number of online schedules from any computer or mobile device. This easy-to-use software is ideal for libraries of all sizes, including those with multiple departments or locations.

Administrators can assign tasks to each shift and can instantly view how many employees are scheduled by location, shift and service point. Schedules can be shared with multiple departments, branches and locations, so managers always know which employees are scheduled and where they are assigned to work.

Managers, employees and volunteers can access work schedules remotely to effectively communicate and manage scheduling needs. Users can request and approve time-off and review coverage and staffing needs anytime, from any location. Employees are notified when their schedules are posted or changed.

Developed by TCP Software, ScheduleAnywhere ensures proper shift and service point coverage and fundamentally reduces scheduling errors and conflicts. The software also tracks certifications and training, manages staff availability, and can estimate labor costs. Software upgrades are administered automatically, and live support is included at no additional charge. Free trial accounts are avail-

able, and pricing is based on the number of employees scheduled.

GROUPED TITLE DISPLAY (FRBR) IN CARL•CONNECT DISCOVERY

Patron-driven services are at the forefront of CARL•Connect Discovery, providing library staff with innovative ways to serve an ever-evolving community of patrons. Continuing the trend of innovation, recent versions have introduced Grouped Title Display into CARL•Connect Discovery for Desktop and Mobile.

CARL•Connect Discovery Grouped Title Display builds upon TLC's proprietary data matching algorithm, which groups content (or Works) of the same intellectual content. The grouped content is presented to CARL•Connect Discovery users through a streamlined display of titles and formats owned by the library, allowing users to search and retrieve results with little fuss. With Grouped Title Display, a search for "Pride and Prejudice" will not require users to sift through numerous records separated by format to find the result they want. Now every possible format is grouped under one result, not only enhancing the library's user experience within the discovery layer but exposing more of a library's collection to the public, which increases circulation. CARL•Connect Discovery Grouped Title Display continues to evolve as our libraries choose to implement this functionality, driving more of our development effort to continue improving the patron experience on behalf of our libraries. TLC is excited to offer this experience to libraries and to continue to improve it in the future.

ITS•MARC

With over 81 million records from 23 databases, ITS•MARC makes it easy to find quality MARC records. With quick access to recently published materials, catalogers can decrease the time it takes to get new items into the collection.

ITS•MARC updates daily with records from the Library of Congress and weekly with datasets contributed by TLC customers. Other databases update weekly, monthly, and quarterly -- including the National Library of Medicine, the National Library of Canada, and U.S. Government agencies.

In the last year, TLC established new partnerships to expand ITS•MARC Contributed, to provide more access to recently published titles and increases access to records specific to school libraries.

The newest dataset, MetaMARC, generates and enriches records for non-MARC metadata. When there is no other available title record, MetaMARC provides a head start.

TLC - The Library Corporation

LIBRARY•SOLUTION FOR SCHOOLS

The Library Corporation (TLC) pioneered Library•Solution for Schools to accommodate the technical and analytical requirements of large, centralized school districts, while maintaining autonomy for each individual school.

Through our 20+ years of collaboration with K-12 partners like your school system, we have refined our workflows for maximum daily efficiency and for year-over-year student transitions. We continue to successfully engage our customers with ongoing, interactive focus groups. The security of student data is never an afterthought at TLC. We take a proactive approach to application security through

our continuous development cycle, and TLC acts quickly to mitigate new risks. Our customer-centric approach to support remains unrivaled in the K-12 industry today. A dedicated school support team will be available to assist from the simplest questions to complex projects, with emergency support services available 24/7 every day of the year.

The library landscape continues to change due to ongoing corporate mergers and acquisitions, but TLC has held true for over 45 years and counting.

MAGNAPOS-L

MagnaPOS-L is the first Point of Sale application for libraries. It is a complete point-of-sale solution built for Windows-based systems that can turn any PC into a cash register. It allows you to pay patron fines and fees, process payment, control access to cash, and provide the reports you need to offer superior customer service. MagnaPOS-L can provide a complete end-to-end solution whether you have one branch or many.

- Key Features:
- Interfaces directly with your ILS to access patron accounts
 - Accept cash, checks, credit & debit cards, gift cards & more
 - Windows Based software that is fast and easy to use
 - Detailed reporting lets you keep track of transactions and more
 - Manage Multiple Registers
 - Manage items in inventory, and report on all branch activity from one central location
 - Consolidate credit card processing from multiple registers

Bring together sales information from across your organization with MagnaPOS Enterprise Manager. Featuring centralized management and reporting for an unlimited number of registers and locations it is the most flexible, cost-effective way to view the big picture and keep all your branches running.

Compare and contrast branch performance.

Manage register configuration to conform to your policies.

Built on Microsoft SQL Server, your data is accessible, and there is no limit to how many workstations you can handle.

MYPC WITH EASYBOOKING & PAPER CUT FOR COMPUTER RESERVATION & PRINT MANAGEMENT

TBS's computer time management MyPC provides unrestricted methods of reservations—walk up, guaranteed bookings queue-based. (Queued patrons get text messages when their reservation is available).

TBS ILS SmartConnect checks the entire patron record-making decisions on rules priority or simultaneous rules & groups users by specific rules or profiles.

Central server management (which runs as a service) & a Staff Portal with browser-based connectivity, a centralized dashboard to manage print, guest passes, patron re-printing & staff release of patron print jobs.

The MyPC portal features a single view of computer areas, locations, or buildings in the system allowing staff to perform daily functions from anywhere. MyPC integrates with PaperCut & both are compatible with Windows & MAC on a SQL platform for cumulative statistical reporting.

The new feature, Preparation Time for MyPC – Due to the recent global pandemic we have added new optional functionality to MyPC. PrepTime is set at the Location Policy Level and allows you to define a time in minutes before and/or after a patron uses a PC for staff to clean the screen, keyboard, mouse, desk, and surfaces around the MyPC controlled PC.

PaperCut offers anonymous printing, & automatic login. Real-time fleet management lets IT oversee all output devices & vending kiosks from any location. Features standard windows printing, Centrally submitted print jobs can be released anywhere within the system for Follow-Me printing.

More information

SCANEZ SCAN STATION

The new TBS ScanEZ simple scan station allows patrons to scan STANDARD to smart devices, email, USBs, printers, fax, Box, DropBox, One Drive, Google Docs, & more. Standard scanning file formats include DOC, JPG, PNG, TIFF, GIF, PDF, Searchable PDF, PDF/A & more.

New Image Enhancement functionality revives old photos and documents by analyzing the sharpness, contrast, color, and saturation on the fly to give the patron a revived image or document. Restoring memories that could have been lost.

A multilingual interface allows users to switch on-screen text to one of 25 different languages, & a Multilingual Translation Service to translate scanned text from one language to one of 60 supported languages. Translated files are sent to the user as a Microsoft Word file, along with a subset of languages for MP3 audio files, with a

constantly growing catalog of languages.

ABBYY® Fine Reader OCR for unmatched Optical Character Recognition & accuracy for searchable PDFs and Word documents, with 192 languages standard for OCR Multilingual capabilities. Accessibility features make it easy for the visually impaired & blind to use the station with a magnifier, narrator & high-contrast scheme.

Enhanced Authentication via LDAP, SMTP, Gmail, Facebook & more.

Features a web Portal for centralized reports at no additional charge, and a Management Dashboard for instant remote access to every station within your fleet, all from your desk or mobile device.

More information

Today's Business Solutions, Inc.

TBS-KIOSK

The TBS-9900 Payment Kiosk series features a reduced footprint. This print release system does not require a computer for print release or large cabinets, maximizing valuable floor space. The kiosks consist of coin, bill & credit card payment options along with a CPad device that

controls access & enforces payment for copy, print, scan, and faxes all from a single vending device. The kiosk is sturdy & wears well in a public use environment with clean cable management. Giving patrons one user interface to conduct their transactions, simplifying the entire process.

These units feature a secure PCI-compliant credit card terminal. Credit card transactions are processed on a secure cellular network at a low micro-transaction rate per swipe with no minimum fees. Each terminal supports EMV Chip, Swipe, and NFC (Apple Pay, Android Pay & More).

Optional upgrades include high-capacity coin tubes & bill recycler that gives back change in coins & bills, enabling users to utilize larger bill denominations without depleting the tower. This system automatically replenishes itself with coins & bills, elevating staff from having to be filling the coins & bills within the kiosk constantly.

Audit receipts can be printed from the TBS-Kiosk to reconcile funds and to account for all financial activity conducted at each kiosk, as well as provide centralized reporting for verification of activity.

Transparent Language, Inc.

TRANSPARENT LANGUAGE ONLINE

Transparent Language Online provides digital learning materials in 120+ languages, including English for speakers of 30+ other languages, 20+ indigenous languages, and American Sign Language. There's something to suit every age and interest, including "KidSpeak" for K-2 learners, elementary courses for grades 3-5, "Teen Voices" for middle and high schoolers, the travel-focused "Essentials" course for adventurers, and business-focused vocabulary lessons for professionals. Every course builds their vocabulary and provides opportunities to practice the four core skills: listening, speaking, reading, and writing.

Learners can also customize their experience with additional resources like alphabet courses for non-Latin languages, a grammar reference with written and video explanations, and a vocabulary review system to help them retain what they learn. To stay on track, learners can set a daily learning goal in Transparent Language Online, and log time towards that goal anytime, anywhere, on almost any computer, phone, or tablet.

HEAR FROM THE JUDGES:

"Transparent Language is an easy to use language learning program. The content does not get stale. The support from the vendor for marketing, training and any other ad hoc requests has always been quick, thorough and efficient."

More information

Tutor.com

TUTOR.COM

Thanks to library partnerships, patrons from K-12 through college, career, and continuing ed can access Tutor.com's expert, on-demand 1-to-1 tutoring and dropoff review services at no cost. For 22+ years and 23M sessions, Tutor.com has supported library communities, with an aggregate LSA >67M (~1/5 the

U.S. population).

Our mission is to instill hope, advance equity, and catalyze achievement; 35% of library partners have 10+ years' longevity. Leesa Aiken (SCSL) said Tutor.com has "made a huge impact on homes in South Carolina" (youtu.be/2N-fcuZ2zrQ). Karen Parry (East Brunswick PL) said: "Your tutors delivered dependable, high quality instruction...to support struggling students and those wishing to enhance their knowledge. The true testimonial is the high ratings of tutors...consistently given by our students."

Tutor.com provides:

- 1-to-1 tutoring in 100+ subjects and test-prep areas, incl. bilingual Spanish support
- Dropoff writing, math, cover letter, resume review
- Text-chat, 2-way voice options
- Computer, tablet, mobile access
- Math/ELA, AP® videos
- The Princeton Review® SAT®/ACT® Essentials courses
- GMAT®, GRE®, LSAT®, MCAT® practice tests
- ASVAB, math, science, English practice quizzes
- Study skills/parent coaching
- Optional session history, favorite tutors
- We adhere to FERPA, COPPA, CCPA. We regularly add subjects and host free patron webinars and staff trainings. Patrons will soon get UI enhancement.

AWE Learning

EARLY LITERACY STATION™ PLATINUM V2

The Early Literacy Station™ Platinum (ELS Platinum), for ages 2-8, delivers more than 85+ award-winning, pre-loaded

educational software titles directly on the workstation. With no internet required, this provides the library's youngest learners with a safe learning environment on a digital platform. All content is STREAM-aligned (Science, Technology, Reading, Engineering, Art and Music, and Math). ELS Platinum is plug-and-play, with little or no interaction from the library staff, and all technical support is handled directly by AWE Learning.

Content is delivered on colorful backgrounds with subject-based interfaces for each of the STREAM areas. The interactive content will keep kids engaged, and most importantly, they will be learning. Educational titles include handwriting, e-books (fiction and non-fiction), coding, and so much more. ELS Platinum also has the ability to add on bundles to offer more titles on one workstation.

All of AWE Learning's products include access to the unique online Customer Portal allowing staff to easily view utilization statistics for any given time. The statistics include seeing which programs are utilized the most by the youngest patrons. This data will demonstrate return on investment, as well as plan library programming around areas that are of most interest to patrons.

ConverSight.ai

MYLIBRO

myLIBRO is an all-in-one mobile application centralizing library services into one mobile environment, reducing the need for patrons to have four, five or six mobile apps to use library services.

During the pandemic, myLIBRO helped libraries satisfy curbside pick-up and manage in-person attendance through its scheduling capabilities. Since, myLIBRO has become the library's Virtual Branch, incorporating digital offerings, self-check-out, chat with a librarian and much more.

myLIBRO serves more than 500 libraries across the United States and is having its best year of growth yet in 2022.

The Crowley Company

ZEUTSCHEL ZETA BOOK SCANNER

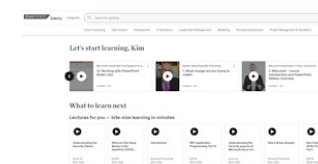

A library favorite, this "plug-and-scan" Zeutschel zeta book scanner can quickly replace traditional copiers in public and academic libraries around the nation. It is ideal for libraries, universities, records management operations and other organizations that require an easy-to-use walk-up system or a scanner for low-volume archival capture.

The Zeutschel zeta's compact design and easy-to-use touchscreen interface allow patrons and operators to easily convert books, magazines, loose documents and other materials to a variety of digital formats that can also be saved to a USB or in the cloud.

The zeta can be easily transported wherever you go and delivers high-quality data with the highest resolution quickly. The size of the zeta is space-saving and the scan speed and ease of use allow patrons to operate in faster in one-tenth of the time compared with older technology. The Perfect Book 3.0 software also perfects scanned book images through page straightening, removing book fold distortions and other automatic enhancements.

Gale, part of Cengage Group

GALE PRESENTS: UDEMY

Gale Presents: Udemmy is an e-learning/upskilling platform that focuses on in-de-

mand professional and personal development topics across 75 categories. From understanding the blockchain, to better implementing DE&I initiatives in the workplace, to yoga and healthy eating, Gale Presents: Udemmy offers thousands of relevant on-demand video courses for all patrons with a desire to learn a new skill or deepen a personal interest.

One of the most unique aspects of Gale Presents: Udemmy is its focus on content in languages other than English. Close to 9,000 courses across all categories are created natively in other languages including Arabic, French, German, Indonesian, Italian, Japanese, Mandarin, Polish, Portuguese, Russian, Spanish, and Turkish. As the only library resource offering virtual skills training taught by native speakers, public libraries can reach a more diverse set of patrons, breaking down barriers to learning.

Udemmy's one-of-a-kind content creation model and real-world expert instructors enable them to bring new and updated courses to market quicker than traditional content publishers. In fact, 85 percent of the collection has been updated within the last two years. This ensures Libraries can deliver the most relevant, up-to-date information on topics patrons need to upskill or reskill, helping to move their community members forward.

HEAR FROM THE JUDGES:

"Our library patrons appreciate the diversity of classes that are offered. There is a wide variety of entertaining and educational classes that patrons can access at their own pace."

More information

Hiveclass

HIVECLASS DIGITAL ENCYCLOPEDIA

Hiveclass is a web-based Digital Encyclopedia that provides instruction in a wide range of sports & activities. Our goal? To democratize access to quality instruction in youth sports for families nationwide. Why? Because physical education in schools is sub-par, too many are priced out of extracurricular programs & certain sports aren't available in different parts of the country. We offer kids the ability to explore & develop an interest in sports & physical activity in a low stakes setting at no cost to the patron & available through their local library.

The Hiveclass platform was created with libraries in mind to help professionals engage with patrons, elevate their digital resources & explore new ideas for programming. No matter how it's being utilized, Hiveclass meets kids where they're at, whether they have experience in sports or not. We built our platform alongside educators with a scaffolded skill progression to ensure quality & consistency in learning in an easily digestible format. Currently, Hiveclass offers over 1,200 videos across 8 different sports/activities with 4 more to come by the end of the year. Additionally, we prioritize accessibility with a dedicated widget for differently abled patrons and all videos are available in English & Spanish with subtitles to match.

MOBILE WORKLISTS

Mobile Worklists is an iOS and Android mobile app that makes materials handling and management tasks more efficient for library staff. Its flexible features help staff quickly complete large-scale projects and establish efficient day-to-day workflows for libraries of all types and sizes.

Mobile Worklists provides completely mobile functionality for traditional library operations, such as weeding, labelling, conducting inventory, ILL delivery tracking, creating displays, relocation projects, managing new collections, and generating lists of course reserve items.

Features:

- Check out capability with full support for circulation rules
- Check in capability from a list or on the fly
- Manage current Sierra lists or create new lists of records in the app that can be filtered and sorted
- Scan barcodes with the camera on your mobile device using integrated barcode scanning
- Use the app as a real-time alternative to a paper pick list
- Update item status directly from the app
- Manage complex projects with built-in list management capabilities
- E-mail lists to staff or library users, with the option to attach as a CSV file
- Send lists to Sierra and update items in Sierra using Global or Rapid Update
- Conduct inventory by comparing what's on the shelf against a Sierra-generated shelf list and updating item inventory information right from the app
- Codabar, Code 39, Code 128, Plessey, Telepen, and EAN barcode Support

POLARIS ILS

Consistently one of the most popular systems for public libraries, Polaris offers a comprehensive ILS solution designed specifically for the unique needs of public libraries of all types—single site, multi-branch, and consortia.

Designed to provide a robust and scalable software solution with powerful staff tools and an intuitive experience for patrons, the Polaris ILS is open to connections with your patrons and their social media, third-party vendors, and resources outside your library.

Polaris libraries quickly see staff productivity increase, patron satisfaction soar, and returns on their technology investment because Polaris has features designed, built, and improved year after year by people who know technology and the librarians who use it.

Our libraries report that after implementing the Polaris ILS, staff saw the following changes:

- Decreased time spent managing acquisitions and print serials by 65%
- Decreased time spent on catalog management and maintenance by 70%
- Decreased time spent creating reports by 60%
- Increased budget by 5% as a result of being able to better report on library value

Library Systems & Services

LS&S MANAGED SERVICES

Library Systems & Services (LS&S) delivers impact to communities through library excellence. A trusted partner to over 75 communities across the country for over four decades, LS&S provides an alternative service delivery model that focuses on service excellence, operational effec-

tiveness and innovation. Library experts partner with community leaders to strategize, develop and deliver library services in alignment with community goals, then manage day-to-day library operations with a focus on resource and service optimization. Library staff are supported by back-office professionals in operations, human resources, information technology, finance, marketing and analytics with decades of experience. LS&S offers all of the advantages of a large consortium - expert leaders, volume discounts, proven programs, efficient management and innovative ideas - to communities of every size. From single location historic buildings to sprawling multi-branch county systems, LS&S delivers a one-of-a-kind service to strategically address each library's challenges and enhance services to meet community needs. This means stronger library service at a lower cost, alleviating the challenge of balancing budget and service quality. The difference is game changing.

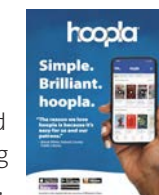

More information

Midwest Tape HOOPLA

hoopla is the comprehensive digital media management and delivery platform created by Midwest Tape. Serving public libraries in the US, Canada, Australia, and New Zealand, hoopla allows libraries to manage and deliver audiobooks, eBooks, comics, music, movies, TV shows, and magazines 24 hours a day, 365 days a year. The content includes the latest hit titles as well as enduring favorites from thousands of publishers and studios. And, the patron experience leads the industry with users across iOS, Android, and web devices consistently rating hoopla 4.5+ out of 5.

Libraries benefit from a variety of features designed to save time and money. Offering pay-per-use (hoopla Instant) and one copy/one user (hoopla Flex) titles, hoopla combines them with utilization and cost comparison tools that allow libraries to purchase the best combination of licenses. Libraries can also tailor a variety of patron and circulation policies.

hoopla also provides a host of patron-fa-

favorite features. Accounts sync across all devices so they can always pick up where they left off. Patrons can also download titles to their devices so they are available even when the internet is not. And, since hoopla serves all formats on one app, patrons always know where to find what they love.

CAPIRAMOBILE

- CapiraMobile brings the library to life in the hands of users. This custom library app strengthens relationships between the library and people who use its collections and services, wherever they are. Communication options and a personalized interface encourage meaningful engagement, helping libraries meet evolving expectations.
- The app creates an authentic digital extension of the familiar library experience from searching the catalog and reserving materials, to renewing a library card. Robust customization means the library brand is always front and center.
- Libraries can meet library users where they are with an easy to install and customizable app that increases library use and inspires active engagement.
- Libraries can personalize the experience with a custom interface and have access to a robust dashboard, allowing them to make changes (app settings, hours/locations, icons, button text, and more).
- Our latest version allows us to take advantage of enhanced ILS APIs (update notice preferences, change PIN, notices/messages without leaving the app, etc.), better search capabilities, and more.
- Push notifications with strategic marketing messages, social media integration, and events promotion make CapiraMobile an effective communication tool.
- CapiraMobile allows for quick pivots as user needs and expectations change. A wide range of reports provide an in-depth view into acquisitions, user engagement, and outcomes of libraries' objectives to track success.

HEAR FROM THE JUDGES:

“Tech support has always been responsive and accommodating to our requests and willing to work with us. And CapiraMobile is very customizable, which is appreciated.”

Gale, part of Cengage Group

GALE DIGITAL SCHOLAR LAB

Gale Digital Scholar Lab (The Lab) is a cloud-based research environment designed to transform how scholars and students access and analyze primary source materials. By integrating digital primary sources with some of today's most popular digital humanities analysis and visualization methods, The Lab provides a new lens to explore history and empowers researchers to deepen understanding of the world and how it is represented in the written word.

At the center of The Lab is a 3-step workflow: Build, Clean, and Analyze.

- BUILD: users curate content sets from Gale Primary Sources collections and/or from local collections uploaded into the tool.
- CLEAN: they prepare texts for analysis by removing stop words, punctuation,

and other attributes that they don't want included in analysis.

- ANALYZE: users run six analyses against their content sets to reveal patterns and trends. Analyses, many of which are built on open-source code, include Document Clustering, Named Entity Recognition, Ngrams, Sentiment Analysis, Topic Modeling, and Parts of Speech. Results are shown in visualizations that users can download for sharing, teaching, and publication. The analyses are also available as downloadable CSV and JSON files for accessibility and for research extensibility.

A core strength of the product is a Learning Center that offers multimedia resources, including instructor-created video guides, for both novice and experienced digital humanists.

solution for library patrons.

This leading-edge technology reduces book scanning to page turning; it automatically creates flat scans from curved pages, separates the left page from the right page, integrates smart tilt correction and auto-cropping, and removes the user's thumbs from the scan area when holding down the pages of a thick book. As powerful as it is, this state-of-the-art scanner solution also makes it easy for everyone to use it. Flexible in design from the ground up, it enables users to control

the scanner using a touch screen, a hand button, or a foot pedal, while scanning entire pages at the ultra-fast rate of 6 seconds per page - including dual-facing pages of a book or A3-size documents. Powered by ScannX software, it is easy to install, maintain, and monitor.

The company's new Book ScanCenter 6.0 software included with the Overhead Scanners represents a new industry standard in security and features. Not only can you scan to the cloud, email, USB, and mobile device (among others)

in PDF, searchable PDF and Word docx file formats, now you can also print from the cloud, and from USB drives. ScannX also offers faxing, and translation services.

HEAR FROM THE JUDGES:

“This product has been used in our Archive department, because it's able to scan large items with high resolution. The tech support and customer service have been great to work with!”
