Take your library to the classroom with Gale In Context: For Educators

Looking for a better way to collaborate with teachers and students? *Gale In Context: For Educators* is a one-stop resource that equips educators with lesson-planning tools to curate their digital class curriculum by combining standards-aligned content that supports core elementary, middle, and high school subjects from *Gale In Context* student databases. Because when teachers succeed, students can too.

DISCOVER

Search across subscribed *Gale In Context* student databases by subject or keyword.

ALIGN

Support curriculum with instructional content, lesson plans, and class activities aligned to national and state standards.

CUSTOMIZE

Use tools to customize resources and build personalized digital lessons with notes and annotations.

Product screen capture as of December 2021. Actual interface may vary.

CURATE

Browse curated informational texts, multimedia resources, and learning activities by course subject.

COLLABORATE

Create personal content sets for organizing class materials to share with students and colleagues using learning management system (LMS), Google Classroom or Drive, permanent link, or email.

"I'm often a pilot school for various content platforms so that we can stay ahead of the latest and greatest resources coming out, but I seem to find myself consistently referring to what Gale has done with *Gale In Context: For Educators*. They've set the bar pretty high!"

— 2022 Modern Library Awards Judge

See what the buzz is about at gale.com/mlawinner

Gale, here for **everyone.**

The 2022 Modern Library Awards (MLAs) is proud to announce its review scores from participating companies in this special supplement to Library Products & Services News. The MLAs are an unbiased program recognizing the elite products and services that serve the library industry. Companies provided concise write-ups of their products/services and submitted them for review. These were then sent out to the LibraryWorks readership — librarians in public, academic, K-12, and special libraries — who then submitted their reviews on a 1-10 scoring system. Each judge had to have had experience with the product or service, and each participating company also had to provide at least four references of library placements to submit their forms. The LibraryWorks staff had no influence on the scoring. Awards were based on the following scores:

6.5-7.4 Silver 7.5-8.4 Gold 8.5-10.0 Platinum Highest Overall Scores — Product of the Year and Service of the Year

The 2022 roster of products awards includes:

GALE IN CONTEXT: FOR EDUCATORS

Gale In Context: For Educators is a lesson planning tool that enables educators to find and personalize digital learning content, plan activities for remote or in-person environments, and foster an equitable and culturally responsive classroom with, diversity, equity, and inclusion (DEI) and social and emotional learning content and lessons. Fueled by content from the Gale In Context student databases and a school/district's student-facing Gale eBooks, it includes custom lesson plans and exclusive tools to help educators save time and teach with easily-shar-

able, curriculum-aligned resources, while enabling seamless collaboration within and across schools and districts. All to help students succeed.

HEAR FROM THE JUDGES:

“I'm often a pilot school for various content platforms so that we can stay ahead of the latest and greatest resources coming out but I seem to find myself consistently referring to what Gale has done with GIC for Educators. They've set the bar pretty high!”

“To better create a more equitable learning environment, Gale has found a way to blend accessibility and learning better than any other company/product on the market.”
“Our staff (Librarians as well as Classroom teachers and school based administrators) have found this resource to be content rich. It is a time saver and staff know they are getting high quality content from a trustworthy source.”

More information

Dear Reader,

I hope you enjoy the 2022 Modern Library Awards special edition and that you take advantage of the outstanding products and services offered by these respected companies. Our entire team would like to thank all judges and applicants who made the 2022 program such a success. Your enthusiasm and encouragement kept us going through another very busy award season and we were overwhelmed by the positive response.

Congratulations to the following judges who were randomly drawn to win a \$25 Amazon gift card: Tina F., Vivian E., Jill E., Joanne P., Rachel M., Kate H., Thomas H., Mary S., Kat L., Andrew S., Jeff D., and Jennifer H.

If you are a librarian and are interested in acting as a judge for the 2023 Modern Library Awards, please email the following information to jenny@libraryworks.com: name, title, email address, and library name. If you have a product or service that you would like to enter in the 2023 Modern Library Awards, please email the following information to sharon@libraryworks.com: name, title, email address, company name, and product/service name(s).

Products that were entered in the 2022 Modern Library Awards are eligible to be entered into the 2023 program.

If you have any questions regarding the MLAs or thoughts to improve, I'd love to hear from you! Please feel free to contact me.

Best regards,

Jenny

ABOUT LIBRARYWORKS

LibraryWorks helps administrators to make informed decisions about library technology, automation and software, collection development and management, facilities and furnishings, staffing, purchasing, and other areas that drive effective strategic planning and day-to-day operations. Our family of resources can enable you to identify best practices, monitor trends, evaluate new products and services, apply for grants and funding, post or find a job, and even enjoy some library humor.

The Modern Library Awards (MLA) and LibraryWorks, Inc. are not responsible for representations made by MLA honorees.

Eight Straight Years of Delivering Platinum Customer Service!

ScannX® is honored to have the distinction of being recognized with Platinum Level Modern Library Awards once again this year for our innovative book scanners: ScannX Book ScanCenter, Zeutschel OS15000 Comfort, and Zeutschel OS16000 Comfort. Each of these is powered by our intuitive software that enables even non-technical users to easily accomplish all of their scanning needs.

Introducing the new CZUR ET18 Pro Scanner by ScannX

Our latest offering delivers everything you want in an entry-level overhead scanner. It creates flat scans from curved books, enables glossy prints to be scanned without glare or reflection, and automatically removes thumbs. The end result? Exceptional scans every time. Plus, it includes accessibility features for the visually impaired and vending solutions for cost recovery.

"We have been using ScannX scanners, but particularly the book-edge. We use it for both student and internal library scanning. We have had some, I believe, for over 10 years and they are still running strong. Both students and library personnel comment on the ease of use. For the students, we have scanners on each floor of the library and leave them unattended by library staff. Either by word of mouth or just convenience, the students run these scanners hard with no complaints."

—2021 MLA Award Judge

We don't take these words or these awards for granted. Instead, it focuses us intently on making sure this level of satisfaction is the experience of every ScannX customer. Buying a scanner from ScannX is the first step in an ongoing relationship, not the last.

The Crowley Company

CROWLEY DIGITIZATION SERVICES

As repositories for historical and collected archives and records, libraries comprise a significant portion of Crowley's Digitization Services activity. For more than four decades, Crowley has served the imaging needs of librarians and archivists by preserving cultural heritage documents, newspapers, maps, books, microfilm, photographs, slides, glass plates and other still media.

From analog micrographics to today's digital technology, Crowley expertise offers a complete understanding of digital preservation and access. Specializing in high-volume conversions as well as the rare and valuable, Crowley has unique access to premier industry solutions as a reseller or manufacturer of Mekel Technology, Zeutschel, Qidenus, InoTec and Wicks brand scanners. Production efficiency, an in-depth understanding of image quality (including how to achieve FADGI ratings), 40+ years in the industry and low operator turnover are just a few of the advantages clients gain when part-

nering with Crowley Imaging.

Depending on collection requirements, Crowley provides the option to scan in-bureau or onsite while always working to ensure that the final images meet the project requirements and are accessible as the library sees fit.

Specific digitization services for libraries include:

- Paper scanning
- Bound book scanning
- Archival preservation scanning
- Microfilm and microfiche scanning
- Graphic arts collection scanning (photos, slides, films, plates)
- Image hosting and viewing

KURVE HEIGHT-ADJUSTABLE SERVICE DESK

Form and function meet with 3branch's Kurve desk. Kurve desks combine height-adjustability, integrated power, mobility, and an approachable design. Available in six shapes: arch, figure eight, kidney, oval, soft rectangle, and racetrack. Kurve desks are high in ergonomics, function, and visual interest.

More information

AFTERSCHOOL EDGE PLATINUM

AfterSchool Edge Platinum (ASE Platinum) is a fun and engaging digital learning resource for students ages 6-12. ASE Platinum has brand new avatars, animated interfaces (beach, arctic, and robotics themes), and a brand-new content suite offering more than 75 multi-curricular and award-winning educational software titles. As a plug-and-play workstation, ASE Platinum does not require an internet connection, creating a safe and locked-down learning environment for users in the library.

Content is categorized by STREAM subjects (Science, Technology, Reading, Engineering, Arts, Math). Students can read or listen to e-books (fiction, non-fiction, and poetry), practice their handwriting (including cursive), learn about cyber safety with Garfield comic books, improve their typing skills, learning coding skills, and more. All content is fun, interactive, easy to navigate, and extremely engaging for the users.

ASE Platinum is available as an all-in-one, 20-inch touchscreen or tablet device and is ideal for independent or collaborative learning. Libraries also receive homeschooling and programming resources to help integrate them into weekly lesson plans and events. With access to a customer portal, libraries can track usage and illustrate their return on investment. Libraries can increase the number of titles offered on the unit by purchasing an add-on bundle, including coding!

More information

BILINGUAL SPANISH LITERACY STATION PLATINUM

The Bilingual Spanish Literacy Station Platinum (BLS Platinum), for ages 2-8, is a fun and engaging digital learning resource for young patrons. BLS Platinum has brand new avatars, animated interfaces (beach, fairytale, and arctic themes), and a brand-new content suite of 75+ STREAM-aligned award-winning educational software titles, including both English and Spanish content. As a plug-and-play workstation, BLS Platinum does not require an internet connection, creating a safe and locked-down environment for students in the library.

With the click of a button, the content displayed on the interface appears in English or in Spanish, providing content for both those fluent in the English language, as well as English language learners (ELLs). There are also titles for native English language speakers to be introduced to and learn basic Spanish vocabulary, including, but not limited to, colors, numbers, animals, and feelings.

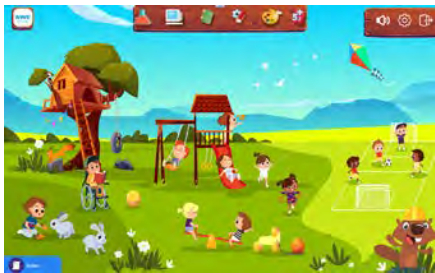

Content spans all curricular areas. Children can learn about cyber safety with Garfield, read or listen to a variety of e-books (fiction and non-fiction) in Spanish and English, practice handwriting and coding skills, and more.

BLS Platinum comes with access to a customer portal to track patron usage. Add more content to the BLS Platinum by purchasing an add-on bundle, including

coding, or additional titles for an older age group.

More information

AWE Learning

EARLY LITERACY STATION PLATINUM

Early Literacy Station™ Platinum (ELS Platinum), for ages 2-8, is a fun and engaging digital learning resource for young patrons. ELS Platinum has brand new avatars, animated interfaces (beach, fairytale, and arctic themes), and a brand-new content suite offering more than 75 STREAM-aligned and award-winning educational software titles. As a plug-and-play workstation, ELS Platinum does not require an internet connection, creating a safe and locked-down learning environment for students in the library.

Content spans all curricular areas and all levels! Early learners can learn about cyber safety with Garfield and friends, read or listen to fiction and non-fiction e-books, practice their handwriting, build coding skills, reinforce sight words, and more. Available as an all-in-one, 20-inch touchscreen or tablet device, ELS Platinum is ideal for both independent and collaborative learning opportunities.

Libraries also receive homeschooling and programming resources to help plan library events and assist with homeschooling. All customers receive access to a customer portal to pull utilization reports (showing time spent on the units by day, week, or month, and time spent on each software title). ELS Platinum gives customers the option to increase

the amount of content available by adding on a content bundle, including a coding bundle.

More information

Biblionix

APOLLO ILS/LSP

The Apollo® ILS/LSP was designed from the start to be cloud-based in a multi-tenant environment. Apollo is solely for public libraries. That's a promise we've made to our customers. There are no schools or colleges that use Apollo.

Standard features include VersaCard® ad-hoc resource sharing/consortia and Gabbie® 2-way texting with commands. Reserve Express® lets patrons subscribe to their favorite authors, media, and series. Plus, there's a "Kids' Catalog", faceted searching, and SQL querying.

Interested libraries begin their exploration of Apollo with a free trial with all of their data, at no cost or commitment. They get to see everything as it will be in a real migration and can still use their current system, unaffected. It's simply the best way to evaluate a new system and avoid surprises.

More information

BMJ

BMJ BEST PRACTICE

BMJ wants to ensure that present and future healthcare professionals improve their knowledge and skill to make better

evidence-based decisions to deliver high-quality patient care. We know research is not enough to adequately equip professionals to put evidence into practice, so we introduced BMJ Best Practice.

BMJ Best Practice is a point of care tool designed around the clinical consultation. This helps the user anticipate clinical questions and find answers in seconds in a searchable and concise format that is practical to use in the clinical space. Hospitals choose to promote the complementary app to ensure users apply best practices and eliminate variation across the continuum of care.

Medical schools trust the tool to underpin efforts to teach EBM (evidence-based medicine). Every condition is structured to help enable the diagnosis, management, and prevention for each patient group, making it the best tool to reinforce teaching. Treatment algorithms for 1,000+ topics coupled with 1,400 case histories support lesson plans and the EBM toolkit ensures basic principles are taught in a way that facilitates the practice of EBM once the student enters the live environment.

HEAR FROM THE JUDGES:

“BMJ Best Practice’s layout is easy to navigate and consistent from module to module - important for health practitioners pressed for time. The combination of narrative and algorithmic display of information provides reading style options. Using a variety of summary tools such as BMJ Best Practice, DynaMed, and UpToDate to address a single clinical question is likely to be more comprehensive and potentially more evidence-based rather than reliance on just one product.”

“I use it to teach EBM and it is very useful.”

More information

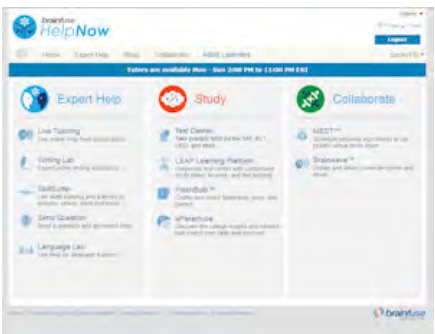

BOOKPAGE

BookPage is a monthly book review that reaches over 400,000 readers each month through more than 3,000 subscribing public libraries and bookstores nationwide. Stores and libraries subscribe to BookPage in bulk quantities to distribute for free to their patrons.

BookPage connects every reader with a book they will love. Each 32-pg issue covers all genres from mystery, historical fiction and romance to literary fiction, history, biography and lifestyles, as well as children's and young adult titles. Our editors evaluate hundreds of books each month in order to recommend the best titles, presenting a curated collection of informative, accessible book reviews, author interviews and special features.

BookPage serves as a valuable resource for librarians across departments: collection development, readers advisory, circulation, and outreach. Subscriptions include access to our Subscriber Resource Center (resources.bookpage.com)—a one-stop-shop for marketing tools designed to maximize the subscription for both staff and patrons, including: Advance Title List—a complete bibliographic list of every title that will be featured in the next issue so librarians can anticipate patron demand and order ahead; Social Media Content Kit—direct, short links to BookPage reviews and interviews to share on all social channels; Social Media Image Gallery—pre-sized images of the new issue to share on socials and website, plus a downloadable PDF to print and post in the library to promote each new issue.

HELPNOW

Brainfuse's HelpNow Virtual Learning System is an award-winning online tutoring and study suite which is backed by an industry-leading academic team, and over 4,000 Brainfuse-certified tutors nationwide. HelpNow offers patrons of all ages state-aligned one-to-one tutoring, intensive writing assistance, targeted skills building, test preparation, and a full line of collaborative learning and self-study tools.

Beyond Homework Help: HelpNow provides a comprehensive range of academic services.

Field-Tested Tutoring: Brainfuse is available in hundreds of library systems in the US, including Suffolk County, San Francisco, Sacramento, Los Angeles County and Chicago (America's largest online homework help program).

High-Quality Tutors: All Brainfuse tutors have 4-year college degrees and undergo a rigorous selection and training process.

State-Aligned Services: All online tutoring, skills lessons, and practice tests are aligned to state and Common Core Standards.

We are one of the most experienced tutoring companies in North America, having completed over 15 million one-to-one online tutoring sessions since 1999. We remain committed to providing high-quality academic support and continually meet student needs through innovative features and services, particularly during COVID-19.

CoLibri System

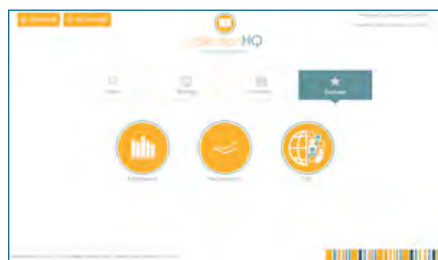

COLIBRI SYSTEM

With the CoLibri System you can protect both paperback and hardcover books of any size in just 30 seconds, making the book covering process easy and fast. Instead of dealing with scissors, tape, glue, bubbles and wrinkles, CoLibri System allows you to cover books with the push of a button.

The CoLibri System is composed of two parts: a portable, compact desktop machine and CoLibri proprietary covers, the first and only covers made with 'I'm Green' polyethylene. Regular polyethylene and polyester are normally produced from fossil raw material, such as oil or natural gas. 'I'm Green' Polyethylene is made from a renewable vegetable raw material: ethanol, which is extracted from sugar cane. The production process of 'I'm Green' polyethylene removes (instead of adding) CO2 from the atmosphere. Since CoLibri covers are acid free and PAT certified, they are also ideal for archives and special collections.

More information

collectionHQ

COLLECTIONHQ

collectionHQ is a collection performance improvement solution, based on the proven Evidence Based Stock Management (EBSM™) methodology. Easy to implement, simple to use and cost-effective, collectionHQ delivers repeatable performance improvements for library

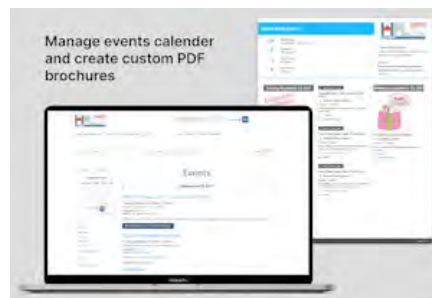

collections by providing evidence-based analysis, advice and performance monitoring of all collections across all media.

The newest addition to the collectionHQ toolset is the Diversity, Equity and Inclusion (DEI) Analysis module. Launched in July 2021, DEI Analysis presents librarians with a dashboard of information about the supply of diverse material in their collection. To ensure that it supports the needs of libraries, the DEI module has been designed based on feedback from librarians participating in collectionHQ's Customer Innovation Program.

DEI Analysis highlights a milestone in the evolution of collectionHQ which, since its inception in 2008, offers librarians a powerful toolset that helps to save money, save time and improve collection performance by identifying local demand and suggesting action plans to address this demand. collectionHQ is owned by Baker & Taylor, the world's largest distributor of physical and digital books and entertainment products.

Communico

ATTEND: CALENDAR & EVENT MANAGEMENT

Elegant, intuitive and customizable program and event management.

Attend has been purpose built from the ground up to provide everything libraries need for the management and promotion of their programs and events and all controlled by staff from the intuitive cloud based control panel.

Registered events, series events and private events are all easily created and managed on the platform with features such as auto wait lists, group registration, custom questions, ILS authentication and text and email notifications. In addition, Attend also has built in mediation, allowing for programs, events and content to

be approved by managers and directors prior to publication.

Upon publishing, the event is added to the event listing and has its own unique webpage dynamically built by the platform, simplifying the process of sharing on social media and other websites. The pages are indexed by search engines, as is the calendar. Virtual and hybrid events are also created and managed with the built-in integration with Zoom Webinar.

Attend is fully integrated within Reserve, Communico's room booking and asset management module, making it quick and easy to associate rooms and reserve library assets and avoid double-bookings.

Attend is also integrated with the other Communico modules making it easy to promote programs and events on a library's website, digital signage, self-serve kiosks, and patron app.

More information

Communico

RESERVE

Easily manage, market and mediate your library's study and meeting rooms.

Reserve is Communico's versatile, elegant and comprehensive solution for room booking and asset management, designed just for public libraries.

Staff can reserve rooms and equipment as they create programs and events and patrons can make reservations from the library's website, patron app or self-serve kiosks or tablets.

Reserve is versatile. Libraries decide the rooms, the hours and the duration both staff and patrons can make reservations for, if there is a charge, if there is a moderator, and control the number of reservations a user group can make in a given period.

The shopping cart feature allows patrons to make multiple room reservations in one booking and receive email and

With Brainfuse, your patrons can access:

- online homework help
- writing lab
- practice tests
- resume & career help
- assistance for veterans
- and so much more!

Award-winning online homework help and so much more!

**Learn more at
brainfuse.com**

text confirmations and reminders. At any time, patrons can view their upcoming reservations online and, if allowed, cancel online.

For staff, access can be very granular and limited to specific branch locations and user levels. Every data point in Reserve is reportable using the customizable report builder.

Reserve integrates with Zoom for virtual room reservations, our Broadcast module to create room booking tablets and with smart locks so patrons may reserve and access rooms without needing staff assistance.

COMPanion Corporation

ALEXANDRIA®

Alexandria® Library Automation builds and promotes library advocacy, making libraries the heart of the learning experience by focusing on 4 key areas: equitable access, discoverability and engagement, 3rd-party integrations, and adoption and support. This solution puts more resources in students' hands, delivers a true one-size-fits-me experience, increases engagement and circulation, and allows more time to focus on what matters most, improving student outcomes.

Alexandria® is more than just library circulation software. It is a tool that helps connect educators to students, and students to curriculum. Alexandria will maximize a library's investment in its

collection in the following ways:

Equitable access and delivery – all patrons have equal access to library resources, regardless of age, ability, learning style, technology limitations, etc.

Engagement and discoverability – tools and interfaces designed to help patrons of all ages and grade levels discover what they need.

Partnerships and integrations – connect various ed tech solutions to save time and leverage resources.

Adoption and success fidelity – from monthly webinars to 24/7 live customer support.

Comprise Technologies

SMART ACCESS MANAGER (SAM)

Smart Access Manager (SAM) has been a cornerstone solution for libraries managing public-access computers for over 25 years. SAM's fully integrated and comprehensive functionality offers the necessary tools to empower patrons while liberating library staff. SAM works in the background and offers library staff a configurable and efficient way to manage PCs for time and print. It also enables PC web reservation and boasts an easy print release/cost management solution. SAM's new welcome screen supports library event announcements while at the same time connecting patrons to resources, and other community engagements. Look

for the new integrated link to SmartPAY on-line as well, which means additional points of payment for patrons. SAM offers all of this in multiple languages as well. SAM's web-based architecture supports centralized management for a spectrum of library settings. SAM converts all print jobs to PDF format, eliminating dependence on local print drivers and enables patrons to preview before printing. SAM also supports multiple payment options. Choose from SAM's account-based system utilizing patrons' existing library card numbers. Pair this up with a Smart Kiosk payment center or have SAM support free printing with daily page limits. SAM is an easy-to-use solution for public PC management.

HEAR FROM THE JUDGES:

“Things that set this product apart include print preview at both the computer and release station, bill paying at any public machine without logging in, easy to customize screen.”

Comprise Technologies

SMART MONEY MANAGER

Smart Money Manager is a complete, fully integrated point-of-sale (POS) cashiering system for financial transactions specific to a library environment. It recognizes patron accounts and links with leading ILS software to check, display, and post payments for fine/fee transactions or other charges. The ILS integrated feature eliminates dual entry, reduces errors, and in doing so, saves staff time. Top it off with accurate reports. Smart Money Manager processes cash, check, or payment card transactions as well as refunds. It displays a list of ILS fees, library merchandise, rentals, or other charges that can be paid through an easy-to-use interface. In addition, Smart Money Manager offers fine/fee waiver capabilities along with the ability to pay

multiple family members' fines in a single transaction. All transactions are recorded in our financial database as well as updated in the patron record real-time. We offer compatible point-of-sale hardware, but our solution can run on your existing service desk PCs as well. No longer do you need standalone cash registers when you have the Smart Money Manager POS system along with Smart Terminal's patron facing credit card system, offering safe contactless payments. Smart Money Manager with Smart Terminal credit card reader meet the Payment Card Industry's Data Security Standard.

[More information](#)

Comprise Technologies

SMARTALEC

SmartALEC supports library and guest credentials for mobile printing from patron devices. Using your library card validates the importance of library services while creating a unique identifier for retrieval of patron print jobs. SmartALEC features an APP and web portal to upload print jobs to SmartALEC's secure cloud service. Once the job is uploaded from anywhere, the patron can go to any branch and use their credentials to download and release the print job from the SmartALEC secure cloud service.

Many libraries are using SmartALEC for remote printing with curbside pickup as an essential service these days. Since SmartALEC is hosted by Comprise there is no need to worry about capacity. Come join our libraries in offering SmartALEC as remote printing with curbside pickup!

HEAR FROM THE JUDGES:

“Easy to use and customized landing page make this exceptional for

library patrons. In multi-branch systems patrons can go to any library to pick up their prints.”

Comprise Technologies

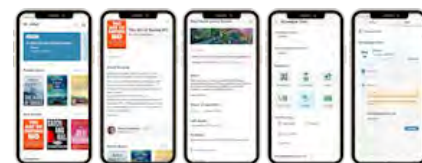

SMARTPAY

Comprise SmartPAY online payment solution enables patrons to make payments and donations to your library in a safer and simpler way. SmartPAY serves as an online payment gateway for libraries and can be a library's best friend in this challenging COVID environment. It links with all leading ILS products to automatically post payments to patron records and support easy reconciliation. SmartPAY helps boost revenue collections securely, offering a convenient remote payment option that supports easy patron access 24 hours a day, 7 days a week. SmartPAY features: fine and fee payments, donations, as well as pre-payment of print accounts, while offering the library the option to charge a convenience fee. Even if the library building is closed, with SmartPAY, patrons can complete secure, fine, fee or other payment transactions, and donors can make contributions directly at the library's website. As a fully hosted service, SmartPAY meets the Payment Card Industry's Data Security Standard.

MYLIBRO

As libraries continued to navigate the challenges and regulations of COVID-19, myLIBRO continued to deliver solutions that helped customers across the country

offer services and open up to the public while the safety of both staff and patrons was kept a priority.

myLIBRO:

- ILS connection to save staff hours and resources
- Facilitates/coordinates appointments for contactless pickup - no phone calls required
- With the myLIBRO library admin portal, staff maintains curbside and call-in orders, saving thousands of hours of repetitive work
- Manages in-library services (computer lab space, passport photos, library ID renewals and orders, library announcements, hours, news, and events)

In 2021 myLIBRO launched myLIBRO 3.0, with a new user interface with several added capabilities to boost engagement including:

- Audiobooks & E-books - Proactive suggestions for popular books, new arrivals, and books you may like and access to a full library of audiobooks.
- Completely contactless self-checkout by simply scanning the barcode
- Enhanced scheduling capabilities for contactless pickup and hybrid library services

Also launched in 2021, myLIBRO Insights helps libraries analyze patron usage patterns supported by artificial intelligence to deliver analytics in a user-friendly format for clear visibility of budgets, staff, inventory, patron engagement and more.

Today, more than 26K in-library services and 703K book reservations have been placed through myLIBRO.

The Crowley Company

USCAN+ HD UNIVERSAL FILM SCANNER

In developing the UScan+ HD Universal

Film scanner series as part of its product line, The Crowley Company has employed decades of industry-leading production microfilm scanner technology and experience into a compact scanner from which library staff and patrons can read, research, digitize, print, and electronically save images from microfilm, microfiche, aperture cards, negatives, and other transmissive media. Marrying high-volume expertise with walk-up patron requirements, the UScan+ series is driven by easy-to-use touch screen or mouse operation and high quality imaging. Simple and intuitive operation ensures that the UScan+ HD scanners are ideal for reading room research, low-volume back-office conversions or as a replacement for outdated microfilm reader-printers. As the demand for digital resources increases and libraries begin to open their doors post-pandemic, the UScan+ is filling an affordable and essential need for both staff and patrons.

The UScan+ HD model features an 18 megapixel ultra-high resolution active pixel area array sensor and a full host of versatile features including optional RapidScan batch scanning, optical character recognition (OCR) capability, pay-per-use interfaces and more.

ZEUTSCHEL SCANSTUDIO

Librarians and archivists are the guardians of our physical cultural heritage in its many forms: paper, book, microfilm, photos, glass plates and physical artifacts. The Zeutschel GmbH ScanStudio was designed for those institutions with a variety of collection types. Mimicking a photographic studio and available with 100MP or 150MP camera options, the ScanStudio digitizes both transmissive and reflective still media as well as flat

3-D objects (i.e. coins, medallions, etc.).

Engineered as a “Graphic Arts Scanner and Photo Studio in One Universal Digitization System,” ScanStudio advantages include:

- A modular, universal system for all digitization tasks
- Interchangeable digital backs and lenses
- Copyboard systems for a wide range of documents
- The shortest scan cycles in the industry
- Reliable results through pre-defined workflows
- Automatic functions: autofocus; automatic exposure control; color profiles; and automatic scanning
- ErgoLED lighting system for shadow- and reflection-free results
- Software for book curve correction and image optimization
- Ability to meet the highest FADGI, Metamorfoze and ISO image standards, capturing up to 9,000 dpi

HEAR FROM THE JUDGES:

“Crowley has given us excellent support of our Zeutschel ScanStudio. They've answered all of the many questions we've had, given great onsite support and taught us how to calibrate it and how to tweak the calibration fine tuning to validate the calibrations to 3 - 4 star FADGI results...”

“...We have been very pleased with the output we've achieved and the speed at which we've been able to complete our digitization projects...”

DEMAC AUTOMATED STORAGE RETRIEVAL SYSTEM (ASRS)

The Dematic Automated Library System (ALS) utilizes Dematic's Automated Storage/Retrieval Systems (ASRS) and a unique integrated software control system to provide fully automated high-density collection management. To preserve library collections, the ALS can operate in a controlled environment that has the proper humidity, temperature and is free of dust and other contaminants.

When an item is returned to a collection

station, the library's integrated library system (ILS) determines whether items are stored on an open shelf or returned to the ALS. To return an item, an operator at an ALS workstation scans its barcode, and the ASRS brings the correct bin. Once the item is placed in the bin, the ASRS returns it. A patron uses the library's ordering system to request an item and retrieves it at the designated circulation desk in minutes. The ALS can assign items to random storage locations, maximize space use, and record all item locations for rapid retrieval. Additional collections, valuable items, items requiring restoration, restricted holdings, and other unique items can be assigned by the ALS to dedicated locations.

User IDs and passwords allow the library's administration to restrict access to specific items, certain ALS commands, and specific reports. In a typical installation, the ALS can efficiently store collections ranging from 250,000 to 10,000,000+ items in an area that would require 1/7th the space of conventional shelving and at substantial cost savings.

FLIPSTER

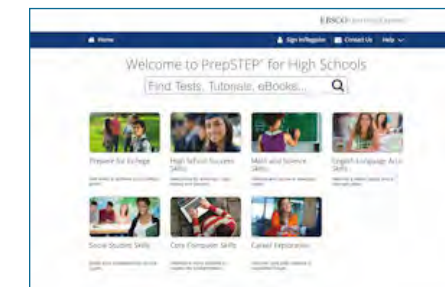

Flipster is a digital magazine platform that allows people to browse the latest issues of popular magazines, from any location, courtesy of the library. Flipster offers an easy, browse-able reading experience for people of all ages and experience levels. Users can browse magazines by category as well as perform searches for specific publications. The table of contents contains links for quick access to articles of interest and links from advertisements and articles within magazines are hyperlinked, opening in separate tabs when clicked. In addition, there is

an option to zoom in and out for better readability. Flipster digital magazines are accessible from school, home, work or on the go and can easily be downloaded for offline reading using the Flipster iOS and Android apps available through Google Play and iTunes. App users can easily locate libraries nearby by enabling geolocation or searching by library name, postal code, city or state.

Popular Flipster titles include: The Atlantic, Better Homes & Gardens, Car & Driver, Consumer Reports, Country Living, Cricket, Entertainment Weekly, Ebony, Elle, Esquire, Forbes, Fortune, Golf Magazine, Good Housekeeping, Harper's Bazaar, Highlights, Men's Health, National Geographic, Newsweek, People, Prevention, Popular Mechanics, Reader's Digest, Rolling Stone, Road & Track, Runner's World, Science News, Sports Illustrated, Southern Living, TIME, Woman's Day, US Weekly and many others.

PREPSTEP FOR HIGH SCHOOLS

Whether they are planning to attend college, join the military or enter the

workforce, students can achieve their goals using PrepSTEP for High Schools. This comprehensive, e-learning platform features seven targeted learning centers containing practice tests, self-directed tutorials, e-books, articles and flashcards. These tools are designed to help students improve core academic skills (English, math, science and social studies); score higher on ACT®, SAT® and AP® exams; acquire basic computer skills; search for colleges and scholarships; explore careers; and prepare for the ASVAB (military) and occupational certification exams. PrepSTEP for High Schools also includes tutorials to help students develop organizational strategies, information literacy, and other important study skills. In addition, educators can use these learning resources to support instruction in a wide range of subject areas. PrepSTEP for High Schools comes in Common Core, Non-Common Core and Canadian versions and is compatible with Blackboard, Canvas, Schoology and Brightspace learning management systems.

Gale In Context: For Educators 2022 MODERN LIBRARY AWARDS PRODUCT OF THE YEAR

EXPLORE NOW

active 1800-2000s through rare, hard to access primary sources. Key coverage includes extremism, civil rights, racism, fascism, communism, socialism, new left activists, anti-Semitism, sexism and homophobia detailing notable groups such as the Black Panther Party, Students for a Democratic Society, Weather Underground, American Nazi Party and the John Birch Society.

Collections in part one includes the American Radicalism Collection at Michigan State University; Hall-Loag Collection of Dissenting and Extremist Printed Propaganda at Brown University; Searchlight Archive at University of Northampton, and government documents from The National Archives, UK. Part two hosts the Social Documents Collection at University of Iowa; Walter Goldwater Radical Pamphlet Collection at University of California, Davis; James Aho Collection at Idaho State University and Christian Identity and Far-Right Wing Politics at University of California, Santa Barbara as well as various files created by the Federal Bureau of Investigation.

A notable feature is audio with accompanying transcripts. The Searchlight Oral Histories Collection hosts interviews with anti-fascist activists whilst the James Aho Collection holds sermons, interviews and lecturers considered to be, or concerning far-right extremism.

Generation Fifth Applications

LIBRARY ARCHIVAL SOFTWARE

Generation Fifth Applications (GFA) offers a solution for library archival and retrieval software in high-density storage facilities. GFA software uses the ultra-efficient tray concept to scan, verify, shelve, store, locate, and retrieve books and other items efficiently based on barcodes and sizes. Using GFA's flagship product, Library Archival Software (LAS), clients have reported that accessioning new volumes can be scanned at speeds up to 500/hour and verified at up to 800/hour. GFA's new Business Intelligence Module with Interactive Dashboards offers Excel integration, customized queries and reports that can be published directly to the web using standard output formats like PDF and HTML. More than 30 major university and library archives including Library of Congress and New York Public Library, Harvard, Yale, ReCAP and Oxford trust GFA software to manage more than 50 million volumes.

More Information

Ingram Content Group Library Services

ICURATE® INCLUSIVE

Ingram's iCurate® inClusive provides a one-time assessment of the diversity of a library's English regular print collection and includes:

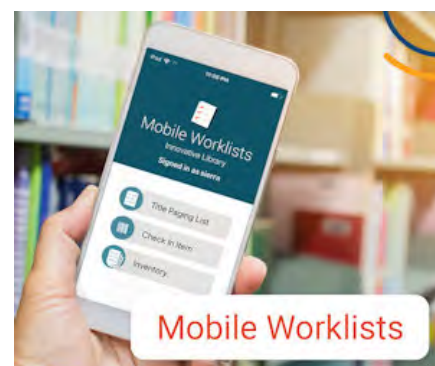

- More than 60 charts and graphs showing the diversity of a library's collection compared to the average public library, including the following categories: Asian Interest, Black Interest, Indigenous Interest, Jewish Interest, Latinx Interest, LGBTQIA+, Mental Health & Addiction, Middle Eastern Interest, Multicultural, Muslim Interest, and Neuro & Physical Diversity
- Excel spreadsheet that can be edited, filtered, and sorted with 24 subject breakouts that includes number of diverse titles currently in the collection in each inClusive category
- Shoppable lists of the diverse titles that are most popular in public libraries,

with the library's holdings and the iCurate® inClusive codes marked, to facilitate the library taking immediate action to fill in any gaps identified

All this reporting and the lists of diverse titles will arrive in two weeks, rather than over a period of months or years, and will save a library the hundreds of hours of staff time required to complete an in-house diversity audit. It also provides practical resources to enable libraries to quickly fill in gaps so that their communities benefit almost immediately.

MOBILE WORKLISTS

Mobile Worklists is an iOS and Android mobile app that makes materials handling and management tasks more efficient for library staff. Its flexible features help staff quickly complete large-scale projects and establish efficient day-to-day workflows for libraries of all types and sizes.

Mobile Worklists provides completely mobile functionality for traditional library operations, such as weeding, labelling, conducting inventory, ILL delivery tracking, creating displays, relocation projects, managing new collections, and generating lists of course reserve items.

Features include:

- Check In capability from a list or on the fly
- Create lists of records in the app that can be filtered and sorted according to item location or record field
- Scan barcodes with the camera on your mobile device using integrated barcode scanning
- Use the app as a real-time alternative to a paper pick list
- Update item status directly from the app
- Manage complex projects with built-in

list management capabilities

- E-mail lists to staff or library users, with the option to attach as a CSV file
- Send lists to Sierra and update items in Sierra using Global or Rapid Update
- Conduct inventory by comparing what's on the shelf against a Sierra-generated shelf list right from the app
- Telepen and EAN barcode Support

POLARIS ILS

With the most robust functionality in its class, Polaris offers a comprehensive ILS solution designed specifically for the unique needs of public libraries of all types—single site, multi-branch, and consortia.

Designed to provide a robust and scalable software solution with powerful staff tools and an intuitive experience for patrons, the Polaris ILS is open to connections with your patrons and their social media, third-party vendors, and resources outside your library.

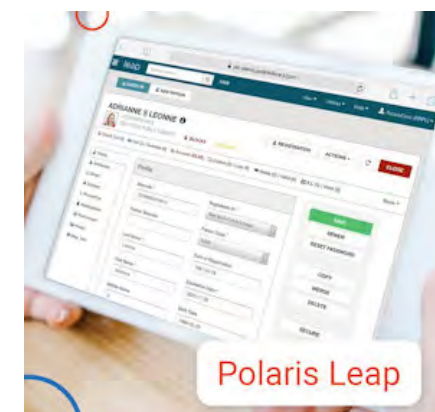

Polaris libraries quickly see staff productivity increase, patron satisfaction soar, and returns on their technology investment because Polaris has features designed, built, and improved year after year by people who know technology and the librarians who use it.

Our libraries report that after implementing the Polaris ILS, staff saw the following changes:

- Decreased time spent managing acquisitions and print serials by 65%
- Decreased time spent on catalog management and maintenance by 70%
- Decreased time spent creating reports by 60%
- Increased budget by 5% as a result of being able to better report on library value

POLARIS LEAP WEB APP

Empower library staff and connect with your patrons wherever they are with Polaris Leap. This responsive web interface brings the power and functionality of the Polaris ILS to library staff through a browser for public services, cataloging, and technical services. Polaris Leap can be used on a desktop, a notebook, or a tablet, freeing staff to connect with patrons and complete tasks wherever it is most convenient – in the stacks, at community events, or even working from home.

The Polaris Leap web application allows staff to get out from behind the desk and still have access to necessary data and functionality with flexible, intuitive workflows.

Functionality includes:

- Check outs, check ins, and renewals
- Offline circulation
- Serials check In
- Patron registration, including patron photo
- Patron account management including claims, reading history, patron associations & more
- Fine payment with ecommerce integration
- Support for outreach services
- Picklist processing
- Hold request management
- Direct integration with Innovative INN-Reach
- Personalized search results display
- Printing, including receipts, holds pickup, in-transit slips and print notices
- Import bibliographic and authority records
- Item record management, including create, copy, edit, delete, and apply bulk actions

VEGA DISCOVER

Built from the ground up and designed specifically for library users, Vega Discover helps patrons find search results and content with the highest degree of accuracy and relevancy available in an online catalog. Discover provides the modern experience patrons expect, using a simple, intuitive interface and linked data to create an immersive library experience that drives interest and exploration.

Features include:

- Modern Discovery: Modern web search tools that match how users find and explore content on popular search engines.
- Patron Self-Service: Personalized experience with an always-present bookshelf that's easy to find and visually appealing where patrons can save items or searches and create custom lists.
- Work Roll-Ups – View multiple formats and editions of the same title in a single search result with one smart “hold” or “check-out” button, simplifying the user experience and

offering at-a-glance availability.

- Integrated E-content – Place holds, check out items, and get started with your e-book or e-audiobook within Discover.
- Showcases – Visual displays of related materials, created automatically by Discover or curated by library staff, that encourage patrons to explore related resources, people, and topics.
- Enhanced Discovery – Powered by Syndetics Unbound enrichment content, Discover makes it easy for patrons to browse library resources and discover new items of interest.
- Accessibility – Responsive user interface adheres to the latest accessibility standards.

International Library Services, Inc.

ILS BOOK SANITIZER

The ILS Book Sanitizer is the first UVCI book and media TABLETOP sanitizer. The machine kills the COVID-19 virus, pathogenic bacteria, and mold with the use of UV-C bulbs and has been laboratory certified. It stands to be the most cost-effective on the market that has been specifically designed for Libraries of all types to include: Schools, Public, Special and Academic. The ILS Book Sanitizer is also currently the best-priced sanitizer available on the market.

As the fastest in the industry, it sanitizes up to 6 books in just 30 seconds allowing organizations to save hours and hours of labor and replace it with 30 seconds.

This state of the art machine utilizes

UV-C (UVGI) light along with high air pressure to remove dust and kill pathogenic germs. Lamp positioning and high-pressure air circulation ensure that all parts of the book are sanitized to include the spine, pages, and cover. The ILS Book Sanitizer not only sanitizes books for quick recirculating, but it can also be used for laptops, tablets, hot spots, DVDs, CDs, keyboards, masks, and even children's books, book bags, and reusable shopping bags.

The compact design and quiet operation allows Libraries to place the unit wherever it is most convenient for use by either staff or patrons. This Book Sanitizer goes the extra mile too with a deodorizing feature to help your books, etc. smell great.

There is no installation required. Just plug it into a regular wall socket (110/120) and it is ready to go.

HEAR FROM THE JUDGES:

“Wonderful addition to our library. So happy with the service and company, we have ordered a second machine.”

(12-, 18-, 24- or 30-bays per system) that dispense a wide range of laptops (i.e. from Dell, HP, Lenovo, Apple, Google), tablets (all 9.7" iPads and iPad Mini) and 110V Portable Power Chargers on-demand to library patrons, recharge devices, automatically return devices back to pre-set image, integration to/with Library ILS and/or LDAP/Active Directory databases, email notifications and full suite of inventory management, audit trail and management reporting functionality.

Up to 30 devices in five feet -- laptops, tablets and/or power chargers separated by row! Do you want to move beyond desktops with smart automated dispensing kiosks? Until recently, desktop labs were the king of open access computing and all the rage. Big, boxy machines that sat on or under rows of desks but were stationary and posed problems as seating could only accommodate desktop users. By transitioning to automated dispensing kiosks, libraries/universities can put in seating for all and reclaim their space... moving away from desktops to a more flexible, comfortable cafe-like environment. And circulation counters can be freed up for librarians to help with info needs, not hand out laptops like robots. Transform your facility by replacing desktops with a practical, space-saving, self-service solution. Replace 20 desktops and reclaim 150 sq ft. and lower your power usage by 90% in the process.

HEAR FROM THE JUDGES:

“Rock solid product requiring nearly zero effort to keep it running for our patrons. It's like having a dedicated staff member who does nothing but checks out, checks in, wipes, reboots, inventories, and charges the laptops for patrons.”

“This product has been amazing for our library and library users. It

saves space, allows self service and freedom to our customers.”

LEID Products

SMARTAXESS™ ELECTRONIC LIBRARY LOCKER SYSTEMS

SmartAcess™ Library Locker Systems, powered by LEID Products, enable libraries of all sizes to provide uninterrupted 24/7 “no touch” service outdoors or indoors, critical as COVID-19 continues to disrupt normal service.

Patrons can retrieve their requested library books by simply passing a library card under the bar code reader. The system recognizes the patron and automatically opens the correct locker door or doors revealing books and materials. Patrons can remove materials without touching the locker, and can close the door with an elbow or shoulder. Patrons can also simply enter their library card number or transaction code on the LCD screen using the corner of a plastic card, pen, pencil or other device.

Once materials are retrieved, the system immediately sends a message to staff that the locker is now available for new materials and another patron.

SmartAcess Electronic Library Lockers can be configured to meet the specific requirements of a library's remote locations. This includes number of lockers and sizes of those lockers. All systems are ADA compliant with 24-inch ground clearance for accessibility and weather implications.

SmartAcess Library Locker Systems are:

- ADA Compliant with 24" ground clearance
- Easy to clean and keep sanitized for patrons and library staff
- Robustly designed, and proven reliable for outdoor installation
- Affordable
- Made in USA

Library Bound Inc.

PROPRIETARY WEB APPLICATION AND ORDERING PLATFORM

Since Library Bound's (LBI) inception in 1993, we have repeatedly implemented innovative features to better serve our customers. A key component of that effort has always been our approach to information technology. This commitment is evident in our industry leading web application and proprietary ordering platform. LBI worked closely with our library partners nationally during the planning stages to ensure we were designing and incorporating features that our customers were asking for. Our complete technology stack is developed and maintained by LBI staff. This in-house development allows for continuous updates, features and improvements being easily deployed with no reliance on 3rd parties. The robust web application along with the back-end architecture provides efficient solutions to our customers and throughout our organization.

Through our close partnership with libraries and our commitment to IT excellence, we provide superior products, services and experience to the library community.

HEAR FROM THE JUDGES:

“Library Bound helps me build the best collection for my library system. Offering the highest standard of usability and functionality, their exceptional ordering platform has simplified my workflow and saved me a huge amount of time. Library Bound's intuitive, comprehensive design and expertly curated collection development lists make searching, discovering and ordering a breeze. The easy-to-generate budget reports are far superior to what our ILS can produce. Always responsive and dynamic, Library Bound regularly updates and innovates based on user suggestions. The support and service shown to their customers is outstanding. Library Bound is an exemplary industry leader.”

“They are open to communicating feedback and suggestions e.g. a pop up note on carts They are very timely in responding to queries. The website interface is very user friendly, vastly easier to use than any of the competition. The website functions in a way that is helpful to librarians and meets the library needs. Designed for use by libraries and library staff. Versatile and flexible. Designed with the user in mind. It works the way things should work.”

“Very happy with LBI's platform. It's straightforward and offers what we need. They have a few features other similar vendors don't have, which I appreciate.”

“Always impressed how LBI continuously improves upon and evolves their ordering site!”

LibraryCall – a project of The Galecia Group

LIBRARYCALL DIAL-A-STORY

LibraryCall is a project of The Galecia Group and the service enables libraries to reach patrons without Broadband by delivering a wide array of services using any type of telephone as well as online. Our affordable, phone-based services are designed to help libraries reach more people and address the challenges many communities faced even before the pandemic – limited access to library spaces and resources, unreliable Internet, and inadequate funding.

Two of our feature services are Storytime Direct and Dial-A-Story Studio. Storytime Direct is a simple service which includes the provision of a local phone number where we deliver a new story every week in English and/or Spanish from our Storytime Commons - a shared repository which currently includes a large selection of multilingual stories recorded, licensed, and adapted by LibraryCall and member libraries.

For a more custom delivery, Dial-A-Story Studio allows libraries to record and share their own stories using our LibraryCall Manager interface. This option also includes the provision of a local phone number and provides access to the Storytime Commons. In addition, we provide libraries with marketing support such as templates for outreach and publicity, and a web widget feature allowing customers to share their stories on their library websites. The Dial-A-Story Studio service

Give your patrons true 24/7 touchless access to their books and materials.

Lightbox Learning

WORLD LANGUAGES SUBSCRIPTION

Teach new languages to improve mental flexibility and increase awareness of other cultures

Our multi-language K–2 resources allow learners to switch between 12 languages with a simple click. Additional languages will be added soon, including Portuguese on October 1, 2021, and Japanese on January 1, 2022.

Our revolutionary K–2 World Languages platform features clean, easy-to-read layouts and full-screen images designed for maximum readability and eye-catching appeal. The full audio feature allows students to listen to the text in their own language as they flip through the book. Students can easily toggle between languages with a simple click and watch as each page is fully translated into another language.

The World Languages interface is clear of clutter, works with all platforms, and is responsive to all screen sizes. The control center at the bottom of the screen ensures that a book's pages are the main focus for early readers.

Mackin Educational Resources

MACKINVIA

MackinVIA is a free digital content management system providing schools, students, and educators with easy access to their collection of ebooks, read-alongs, audiobooks, databases, and videos. With one login, users can view and manage all of the school's digital resources on any desktop, laptop, or mobile device, anywhere, any time. Working with more than 18,000 publishers, MackinVIA provides access to over 3.5 million digital resources in a variety of formats. ebooks are available in a traditional format, and EPUB3. Interactive ebooks integrate video, audio, animation, and activities with the text to enrich the learning experience. Mackin Read-Alongs™, are enhanced with embedded audio, voice-actors, highlighted words, and synched for auto page-turning. Narrated digital audiobooks can be streamed for on-demand listening or downloaded for offline. Educational databases are vetted allowing students to safely use without the threat of inappropriate content. Streaming video allows teachers to reach students with varied learning styles. Additionally, educators can import their own digital materials. New to MackinVIA, Deep Discovery Search, for users to search the contents of their ebook and database collections and return results instantly. Other tools added include assignments, class sets, reading metrics, and learning management compatibility for teacher's use in the classroom.

HEAR FROM THE JUDGES:

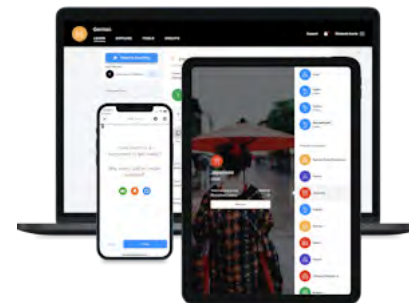

“I love the Google SSO to allow easy access. I can embed this product in my lessons and using the product is not a challenge. This has been a game changer in my school library. Their customer service has been amazing, whenever I call, I get quick help.”

“MackinVIA is a great tool for digital reading in schools. The features of the platform (highlighting, note-taking,

ing, read aloud, font size changes, layout changes) make it adaptable for all users in a school setting. The platform is free and you choose what you fill it with, not some preselected package. The one thing that makes the platform stand out from all the rest is the customer service provided by Mackin. Hands down the best in the business.”

Mango Languages

MANGO LANGUAGES

Guided by its core purpose to enrich lives with language and culture, Mango Languages' language-learning system creates engaging learning experiences for libraries, schools, corporations, government agencies, and individuals across the globe, in more than 70 world languages and more than 20 ESL/ELL courses. To us, language is an adventure.

Mango's self-paced language-learning system was built to get learners speaking. Pronunciation tools, critical-thinking exercises, and cultural context engage learners while complex language acquisition theories and adaptive algorithms are applied behind the scenes.

Rapid skill-building around conversations featuring relevant native-speaker dialogue add additional practicality and pronunciation aid, while retention-building activities like personalized review cards and listening and reading reinforce learned material.

Mango's unique methodology applies Intuitive Language Construction, which helps users learn the four key conversational skills: vocabulary, pronunciation, grammar, and culture. Each lesson begins with a culturally relevant conversation then breaks it down to help learners build connections through patterns.

Mango provides offline accessibility

Media Flex – OPAL Inc.

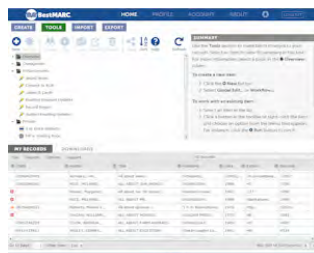

OPALS LIBRARY & INFORMATION MANAGEMENT SYSTEMS

Media Flex OPALS has developed, deployed and serviced library and information technology worldwide for 36 years. OPALS applications were introduced in early two thousand.

Media Flex / OPALS holistic culture embraces system engineering, technical support, tutoring, diversity and inclusion, recognizing that even the smallest libraries need access to standards-based, state of the art, sustainable technology. Media Flex / OPALS encourages communication with librarians providing programmers with a steady stream of intelligence that guides development priorities. During the pandemic, programs to manage curbside delivery, library resource quarantine, resource losses, advanced booking were quickly deployed to enable librarians to continue to provide safe services to their communities.

BESTMARC METADATA MANAGEMENT SOFTWARE

Our mission is to provide the most up-to-date, complete MARC metadata, providing increased discoverability and

circulation, while extending the life of collections. BestMARC, our cloud-based virtual cataloger, was designed and built specifically for this mission and offers tools and resources to automate cataloging processes.

Automatic Record Enhancements and Updates

- Subject Heading Terminology
- Reading Programs (AR, F&P, Lexile, RC, ReadnQuiz)
- RDA Conversion and Standardization
- MARC Record Repair
- National and State Award Notes

Powerful Batch Editing Features (easily build, edit, and share batch cataloging processes)

- Create and Save Workflows
- Global Editing Assignments
- Group Global Edits and Enhancements into Single Tasks
- Add Regular Expressions
- Share All This with Your Team

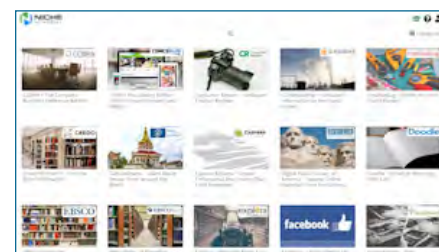

Exclusive Record Creator, Editor and Source (effortlessly create and edit new records from scratch or search the built-in record source)

- Automated Error Checking
- Subject Explorer (find and add new LC, LCAC, Sears, Kid Friendly™ and Genre headings)
- Full MARC Editing (leader, control fields, and data fields)
- Built-in Tips and Examples
- Links to Official MARC Documentation

BestMARC is now integrated with Alexandria Software! This integration provides solutions that increases staff and student engagement, delivers equitable access to all curriculum and reading resources, allows one-click access to digital content, and promotes Library Advocacy, all through one platform.

Niche Academy

NICHE ACADEMY

Niche Academy provides a complete training solution for patrons and library staff. The platform makes it easy to embed tutorials in library websites and also provide a comprehensive online learning environment for library staff. Niche Academy also creates award winning content in the form of ready-to-use tutorials for library staff and patron needs. New tutorials designed for libraries are added every month.

Our success has been demonstrated through many case studies.

- Utah State University's library presentation views went from 1,300 to 35,000 in just one year.
- Library of Michigan created and deployed a statewide professional development program start to finish in just three weeks.
- Suffolk Public Library went from disappointing eresource circulation numbers to a 70% increase in just one year using online training for patrons and staff.
- Barrie Public Library more than doubled program participation in just one year.

Niche Academy serves libraries of every known shape, size, location, and budget, with more than 900 libraries part of the Niche Academy family.

The best part of Niche Academy are the dedicated employees determined to make every library successful in their training needs.

HEAR FROM THE JUDGES:

“Our early days using Niche Academy coincided with the first COVID-related lockdown in Ontario. We relied on Niche Academy to continue our programming and technology help during this period and they were extremely helpful in rolling out regular updates to their platform and in re-

PLATINUM DISTINCTION from Modern Library Awards

OPEN SOURCE AUTOMATED LIBRARY SYSTEM

OPEN SOURCE YOU CAN TRUST!

- + Easy to use
- + Easy to implement
- + Easy to afford

ASK FOR A FREE TEST SITE...

The best way to determine whether OPALS is a good fit for your library is to experience it in the familiar context of your library's data.

- Request a demo: info@opalsinfo.net
- Export MARC records from your existing system
- Upload data to the OPALS demo
- Most demos are ready to evaluate in 24 hours

During the 3 month evaluation period, try all of the system's features and have access to OPALS support staff.

Please email us for some targeted reference sites that would be useful for your library needs: info@opalsinfo.net

CAPIRACURBSIDE

Offer choice and convenience. Simple curbside pickup solution that delivers the convenience people expect. Capira-Curbside is a simple curbside pickup solution that integrates with a library's ILS to efficiently manage distribution of materials. It meets community expectations with a convenient option to get the resources they need when and how it makes sense for them, without adding work for library staff.

- Meets expectations: Stay ahead of changing community needs and expectations with more choices for how people interact with your library, without adding work for staff.
- Customizable: A simple curbside pickup solution that's customizable to meet specific library and user preferences, including the option for SMS alerts when items are ready and staff notification when people have arrived for pick up.
- Convenient: Empower library users to schedule and pick up materials and receive alerts in ways that make sense for them. CapiraCurbside delivers a flexible and seamless user experience

from start to finish.

- Contactless experience: Give staff and library users peace-of-mind during the COVID-19 pandemic with a true contactless pickup experience that's quick, efficient, and convenient.
- Built-in analytics: Boost your library's value as you manage the increase of community usage efficiently and proactively—with the ability to make more informed decisions as circumstances shift.

CAPIRAMOBILE

CapiraMobile brings the library to life in the hands of users. This custom library app strengthens relationships between the library and people who use its collections and services, wherever they are. Communication options and a personalized interface encourage active and meaningful engagement, helping libraries meet evolving expectations.

- CapiraMobile creates an authentic digital extension of the familiar library experience from searching your catalog and reserving materials to renewing a library card, and robust customization means the library brand is always front and center.
- Meet library users where they are with an easy to install and customizable app that increases library use and inspires active engagement.
- Library users can personalize the experience with a custom interface and options for what they want to see and do, including the option to receive event reminders and other information they care about.
- Push notifications with strategic marketing messages, social media integration, and events promotion make Capira an effective communication tool to support library goals that users will appreciate.
- CapiraMobile reveals a new perspective on library engagement so you can pivot fast as needs and expectations change. A wide range of reports provide an in-depth view into acquisitions,

user engagement, and outcomes of objectives you've set to track success.

HEAR FROM THE JUDGES:

“This App is so easy to use for our customers. The company is very responsive to suggestions. I would highly recommend this company for mobile app development.”

“Is always a pleasure to work with and has some of the most customizable features.”

LENDINGKEY

Lend anything and everything they need to succeed.

Your library supports your community with more than just books and articles. From WiFi hotspots to yoga kits, you support all aspects of their lives. Make items outside your traditional catalog browsable and easy to find with LendingKey, a simple library of things reservation software.

As more people are spending time at home these days, many are exploring new hobbies or picking up new skills. Offer them the nonbook resources they need, like your WiFi hotspots, the fancy video camera, or the croquet set. LendingKey is the premier Library of Things reservation and management solution that gets these items into users' hands (and backyards and dorm rooms). LendingKey integrates seamlessly with both MuseumKey and your ILS so that reservations appear in your circulation statistics.

HEAR FROM THE JUDGES:

“They are making changes and upgrades that libraries want and need, and their support is amazing, which is the #1 concern for me when purchasing software.”

OpenAthens (Jisc)

OPENATHENS

OpenAthens develops and supports identity and access management software that allows millions of people to quickly and easily find the information they need with a single login. And even better, we do all the heavy lifting ourselves! We are making seamless access to knowledge easier than ever before.

Incorporating new software into current IT systems doesn't have to be hard work. OpenAthens removes unnecessary complications by smoothly integrating into existing systems to provide the best experience possible.

OpenAthens establishes one set of login credentials for all library resources and applications and integrates with institutions that use IP authentication.

Single links are created that allow patrons access to information needed regardless of their location. OpenAthens provides flexible control for managing access rights to groups of users. Using new or existing attributes, librarians can control access to specific resources based on licenses as well as the structure and strategic focus of their organization.

Comprehensive usage statistics show how often content is accessed and by whom, providing valuable insight into the value of subscriptions and tangible evidence on usage of your online services. OpenAthens makes it easy for people to access the knowledge they want when they want it. That's exciting. You never know what they might end up going on to achieve!

Patron Point, Inc.

PATRON POINT

Patron Point is a patron relationship management system built specifically for public libraries. It harnesses data from a wide range of library systems including the ILS, ebook platforms, event/PC/room booking systems, databases and website to build a unified view of the patron's engagement with the library.

With Patron Point, libraries can use this data to segment its audience and produce personalized, targeted, and timely email and web interactions that can help:

- Grow collection use, program attendance, and volunteer participation;
- Drive a more personalized digital patron experience;
- Evolve and better target library's

offerings; and

- Make its marketing more engaging and cost-effective.

Libraries can benefit immediately from a foundation of Proven Programs™ (including automated patron welcome, card renewal, and “winback” campaigns) or create their own workflows that are customized to their unique user communities and needs.

Recent major enhancements include Patron Point Verify™ (patron address verification that streamlines and enhances the library card registration and renewal process for both patrons and staff) and Recommends™ (monthly reading recommendation newsletter with eye-catching library-branded design that increases patron engagement and library materials use).

R2 DIGITAL LIBRARY

The R2 Digital Library is a market-leading ebook database for health sciences featuring a comprehensive collection of medical, nursing and allied health titles presented in a clean and intuitive interface.

The platform offers thousands of health science ebooks from the leading publishers and professional associations. These high yield, current ebooks provide the specialized content demanded by health science faculty and students. In addition to traditional publisher content, the R2 Digital Library also offers Open Educational Resources (OER).

Ebooks in the R2 Digital Library database are purchased individually, enabling librarians to build collections based on their users' needs. Upon purchase, ebooks are immediately accessible with perpetual access. The platform also offers a unique Patron Driven Acquisition (PDA) model – with no automatic or required purchase – enabling users to inform collection development decisions. The R2 Digital Library has specially curated collections of eBooks focused on various areas of health sciences practice and education.

A web-based database, the R2 Digital Library offers seamless access on desktop computers, laptops, tablets, smartphones and web-capable e-readers. The extensive image library, deep linking, and indexed

search functionality provide an enhanced experience for the user. The R2 Digital Library's user interface is optimized for the health sciences, and R2 Library ebooks are easily integrated into any collection.

SBRnet

SBRNET AND SPORTS MARKET ANALYTICS

SBRnet provides sports business market, data and content for students in business schools, especially those pursuing sports management or sports business degrees.

Our data set includes:

- Participation data on more than 88 sports and activities.
- Fan attendance for all major league sports.
- Worldwide figures for sales of sports gear, apparel and footwear.
- And SBRnet's proprietary fan behavior research, which offers in-depth analysis of how sports fans use social media, play fantasy sports and participate in legalized sports gambling.

Students use this data for class studies, independent research, white papers, case studies and competitions.

SBRnet was purchased in late 2020 by Mark Sullivan and Neil Schwartz, two experienced sports media and research executives. The pair have expanded service to include The Sports Business Resource Center. The “SBR Center” was created to provide students with information and resources that will be helpful to them in their class work, their independent work

Seamless access to online resources, wherever you are.

Thank you judges!

outside of school and eventually in their jobs search after they graduate.

The resources in the SBR Center include:

- Books every sports business student should read.
- SBRnet's recommended list of sports business experts to follow on social media,
- Our guide to the top sports business publications.
- A directory of executives at top professional teams.
- And our own Podcast: "My First Job in Sports," which interviews young execs who are climbing the career ladder in the sports business.

More information

Scannx, Inc.

SCANNX BOOK SCANCENTER

Scannx is a leading developer of book-edge scanning solutions for library pa-

trons and staff, with over 3,500 systems installed in the U.S. Its software incorporates ease-of-use, reliability, security, accessibility, and device monitoring and measurement. With only 3% of the 200 million pages scanned going to print, libraries are saving paper and toner costs while saving trees.

The company's new Book ScanCenter 6.0 software represents a new industry standard in security and features. Not only can you scan to the cloud, email, USB, and mobile device (among others) in PDF, searchable PDF and Word docx file formats, now you can also print from the cloud, from USB drive and from mobile devices. Scannx also offers faxing, mobile print and translation services.

The scanner's patented book-edge design protects the book spine from damage. Its intuitive interface guides users through the scanning process including choosing file format, image quality, file name and scan-to destinations. The system automatically crops, straightens and orients pages with text.

Its translation service converts scanned text from one language to another. Its "Accessibility" features guide visually impaired users through the

scanning process. Scannx also offers software connectors to Tipasa, WorldShare, Article Exchange & ILLiad. Scannx systems connect to coin, bill and credit card payment systems.

HEAR FROM THE JUDGES:

“We have been using Scannx scanners, but particularly the Book Edge. We use it for both student and internal library scanning. We have had some I believe for over 10 years and they are still running strong. Both students and library personnel comment on the ease of use. For the students we have scanners on each floor of the library and leave them unattended by library staff. Either by word of mouth or just convenience, the students run these scanners hard with no complaints.”

CHEMNETBASE

CHEMnetBASE is a collection of cutting-edge interactive chemistry databases and dictionaries that provide instant access to authoritative content. Researchers can perform exhaustive searches using a variety of criteria, including structure searching, create tables, export data in several formats and much more.

Included in this noteworthy collection are 11 distinct products including the CRC Handbook of Chemistry and Physics Online, Combined Chemical Dictionary, Dictionary of Natural Products and much more.

Institutions and corporations can subscribe to individual databases within CHEMnetBASE or CHEMnetBASE in its entirety.

Some Key features of CHEMnetBASE:

- One-Stop Search: perform searches on chemical terms simultaneously across all databases within CHEMnetBASE.
- Chemical Text Search: search by Name, Synonym, Molecular Formula, CAS Registry Number, InChI, InChI key, and/or SMILES.
- Chemical Structure Search: draw a chemical structure using Marvin JS and then search by Exact Match or Substructure; import a structure file or paste in a SMILES, SMARTS or InChI string into the search box.
- Mobile responsive design: use on tablets and mobile devices.

- Save searches: users can create and save their searches and columns in their hit list associated with them, which allows for easy reloading of previous results.
- Customization: users can set up search fields, hit list columns and save as their default.

 - View our upcoming and not yet published content by filtering your search results by “Forthcoming Titles”
 - Navigate easily to other Taylor & Francis digital products from the main menu bar
 - Set up automated MARC records collections via OCLC to automatically add to and maintain your knowledgebase collection data

HEAR FROM THE JUDGES:

“They try and remain at the forefront of new initiatives that will help to serve their users. They are one of the few that actively seeks out engagement and feedback from a wide range of levels in academic institutions (students, general/subject librarians, collections/acquisitions librarians, and management) - which I believe bolsters some of the changes they make. This investment by other publishers is often kept at a management level and can taint the overall needs of the more routine users - something I don't think they suffer from as much. Their products are well known and trusted by our users, and they feel confident incorporating them into their research, teaching, and learning needs.”

TLC – The Library Corporation

CARL•CONNECT DISCOVERY GROUPED TITLE DISPLAY

Patron-driven services are at the forefront of CARL•Connect Discovery, providing library staff with innovative ways to serve an ever-evolving community of patrons. Continuing the trend of innovation, recent versions have introduced Grouped Title Display into CARL•Connect Discovery for Desktop and Mobile.

CARL•Connect Discovery Grouped Title Display builds upon TLC's proprietary data matching algorithm, which groups content (or Works) of the same intellectual content. The grouped content is presented to CARL•Connect Discovery users through a streamlined display of titles and formats owned by the library, allowing users to search and retrieve results with little fuss. With Grouped Title Display, a search for “Pride and Prejudice” will not require users to sift through numerous records separated by format to find the result they want. Now every possible format is grouped under one result, not only enhancing the library's user experience within the discovery layer but exposing more of a library's collection to the public, which increases circulation.

CARL•Connect Discovery Grouped Title Display continues to evolve as our libraries choose to implement this functionality, driving more of our development effort to continue improving the patron experience on behalf of our libraries. TLC is excited to offer this experience to libraries and to continue to improve it in the future.

MYPC WITH EASYBOOKING & PAPER CUT FOR COMPUTER RESERVATION & PRINT MANAGEMENT

TBS's computer time management MyPC provides unrestricted methods of reservations—walk up, guaranteed bookings queue-based. (Queued patrons get text messages when their reservation is available.)

TBS ILS SmartConnect checks the entire patron record-making decisions on rules priority or simultaneous rules and groups users by specific rules or profiles.

Central server management (which runs as a service) and a staff portal with browser-based connectivity, a centralized dashboard to manage print, guest passes, patron re-printing and staff release of patron print jobs.

The MyPC portal features a single view of computer areas, locations, or buildings in the system allowing staff to perform daily functions from anywhere. MyPC integrates with PaperCut and both are compatible with Windows and MAC on a SQL platform for cumulative statistical reporting.

The new feature, Preparation Time for MyPC, added due to the recent global pandemic, adds new optional functionality to MyPC. PrepTime is set at the Location Policy Level and allows you to define a time in minutes before and/or after a patron uses a PC for staff to clean the screen, keyboard, mouse, desk, and surfaces around the MyPC controlled PC.

PaperCut offers anonymous printing, & automatic login. Real-time fleet management lets IT oversee all output devices & vending kiosks from any location. Features standard Windows printing. Centrally submitted print jobs can be released anywhere within the system for Follow-Me printing.

Today's Business Solutions, Inc.

SCANEZ SCAN STATION

The new TBS ScanEZ simple scan station allows patrons to scan STANDARD to smart devices, email, USBs, printers, fax, Box, DropBox, One Drive, Google Docs, and more. Standard scanning file formats include DOC, JPG, PNG, TIFF, GIF, PDF, searchable PDF, PDF/A and others.

New image enhancement functionality revives old photos and documents by analyzing the sharpness, contrast, color, and saturation on the fly to give the patron a revived image or document, restoring memories that could have been lost.

A multilingual interface that allows users to switch on-screen text to one of 25 different languages, and a multilingual translation service to translate scanned text from one language to one of 60 supported languages. Translated files are sent to the user as a Microsoft Word file, along with a subset of languages for MP3 audio files, with a constantly growing catalog of languages.

ABBYY® Fine Reader OCR for optical character recognition and accuracy for searchable PDFs and Word documents, with 192 languages standard for OCR multilingual capabilities.

Accessibility features make it easy for the visually impaired and blind to use the station with a magnifier, narrator and high-contrast scheme.

Enhanced authentication via LDAP, SMTP, Gmail, Facebook and more.

Features a web Portal for centralized reports at no additional charge, and a management dashboard for instant remote access to every station within your fleet, all from your desk or mobile device.

TBS-KIOSK

The TBS-9900 Payment Kiosk series features a reduced footprint. This print release system does not require a computer for print release or large cabinets, maximizing valuable floor space. The kiosks consist of coin, bill and credit card payment options along with a CPad device that controls access & enforces payment for copy, print, scan, and fax all from a single vending device. The kiosk is sturdy and wears well in a public use environment with clean cable management, giving patrons one user interface to conduct their transaction, simplifying the entire process.

These units feature a secure PCI-compliant credit card terminal. Credit card transactions are processed on a secure cellular network at a low micro-transaction rate per swipe with no minimum fees. Each terminal supports EMV Chip, Swipe, NFC (Apple Pay, Android Pay and more).

Optional upgrades include a high capacity coin tubes and bill recycler that gives back change in coin and bills, enabling users to utilize larger bill denominations without depleting the tower. This system automatically replenishes itself with coin and bills, relieving staff from having to constantly be filling the coins and bills within the kiosk.

Audit receipts can be printed from the TBS-Kiosk to reconcile funds and to account for all financial activity conducted at each kiosk, as well as providing centralized reporting for verification of activity.

More information

Transparent Language, Inc.

TRANSPARENT LANGUAGE ONLINE

Transparent Language Online provides digital learning materials in 110+ languages, including English, for speakers of

30+ other languages, as well as 20+ indigenous languages.

There's something to suit every age and interest, including "KidSpeak" for K-2 learners, elementary courses for grades 3-5, "Teen Voices" for middle and high schoolers, the travel-focused "Essentials" course for adventurers, and business-focused vocabulary lessons for professionals. Every course builds their vocabulary and provides opportunities to practice the four core skills: listening, speaking, reading, and writing.

Learners can also customize their experience with additional resources like alphabet courses for non-Latin languages, a grammar reference with written and video explanations, and a vocabulary review system to help them retain what they learn. To stay on track, learners can set a daily learning goal in Transparent Language Online, and log time towards that goal anytime, anywhere, on almost any computer, phone, or tablet.

HEAR FROM THE JUDGES:

“When we needed to make the switch from providing the service through (a different vendor), Transparent Language was very helpful and made the transition a seamless one. The ability for users to learn a language through listening, reading, and writing, coupled with the broad range of languages that are available makes this one of the more comprehensive language learning programs for public libraries. As a librarian in Canada, I appreciate the effort the company has made in making available North American indigenous languages.”

“TLO provides us with excellent support to help us promote TLO to our users. As a user of TLO myself, I enjoy using the desktop and mobile device to learn a new language. In my current capacity, I enjoy sharing the benefits of using TLO with teachers.”

“Transparent Language provides high quality language learning resources that are intuitive for people to use no matter if they are learning for pleasure, school or to master a language. Their high quality customer service, training materials and support materials like

social media posts make it easy to have libraries and schools across the state use Transparent Language with their patrons and students.”

Tutor.com

TUTOR.COM LEARNING SUITE FOR LIBRARIES

For 21 years and 21 million tutoring sessions, Tutor.com has advanced the mission to instill hope, advance equity, and catalyze achievement in communities and schools. With their library cards, patrons—from kindergarten through college, career, and continuing ed—can access no-cost 1-to-1 tutoring and drop-off review services from Tutor.com. We support libraries with an aggregate LSA of 64M; 35% of our library partners have been with us for 10+ years.

Features include:

- 1-to-1 on-demand tutoring in 100+ subjects and test-prep areas, incl. bilingual Spanish support
- Drop-off review for writing, math, cover letters, resumes
- Text-chat and 2-way voice options
- Computer, tablet, mobile access
- Video lessons for math/ELA and 4 AP® subjects
- The Princeton Review® SAT®/ACT® Essentials practice tests, drills, videos, score reports
- Practice tests for GMAT®, GRE®, LSAT®, MCAT®
- Practice quizzes for ASVAB, math, science, English
- SkillsCenter Resource Library
- Optional session history, favorite tutors

We regularly release new subjects (e.g., study skills, CompTIA A+) and host free webinars (e.g., <https://bit.ly/Fall21-Webinars>). Coming soon—Learner Engagements Online (LEO) will feature an enhanced virtual classroom (preview: <https://bit.ly/LEO-LIB>) for an even better learner experience.

HEAR FROM THE JUDGES:

“I can't say enough good things about Tutor.com and the customer service they offer. Tutor.com is extremely responsive, and on at

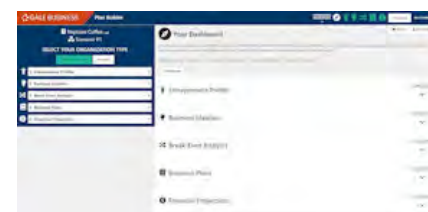

least one occasion they have added a service I requested, which was individualized reading instruction. The public thinks the world of this service. Subscribing to Tutor.com is an incredible commitment to supporting education.”

Gale, part of Cengage Group

GALE BUSINESS: PLAN BUILDER

Gale Business: Plan Builder provides customers with an intuitive, engaging, guided experience by distilling entrepreneurial activities into five essential steps—Entrepreneur Profile, Business Ideation, Break-Even Analysis, Business Plans and Financial Projects. Robust and proven financial templates and business frameworks like Lean Canvas and SWOT analysis are combined with a conversational approach that assumes no exposure to business planning to create a valuable tool that enables users to plan, start or optimize a small business or nonprofit. Additionally, patrons can invite a mentor—from SCORE or elsewhere in the community—to review and comment on their planning progress.

As an added benefit, Gale Business: Plan Builder provides integrated access to three popular resources, Gale Business: DemographicsNow, Gale Business: Entrepreneurship and Gale LegalForms when libraries subscribe to any of these products.

Startups and current business owners need access to a wide variety of supporting information and data as they move their operations through the business

development lifecycle. With Gale Business: Plan Builder, users will encounter up to nearly 400 highly-curated links to “Helpful Resources” that will inform and assist them in completing business planning activities.

Innovative Interfaces, Inc.

INNOVATIVE RESOURCE SHARING (INN-REACH)

For 30 years, INN-Reach has provided libraries with a cost-effective resource-sharing solution that includes an easy-to-use discovery experience for patrons and automated workflows for library staff.

In 2021, Innovative completed testing and certifications for Alma by Ex Libris and Koha supported by ByWater Solutions for the Direct-to-INN-Reach (D2IR) integration, making it easier for new libraries to join INN-Reach resource sharing networks.

By joining a resource sharing network, patrons are instantly connected to millions of new titles without the library investing in new materials. These resources are displayed in a shared discovery interface for an intuitive process that enhances the patron experience. Users simply search the catalog, and easily check-out or place holds on materials—without any additional work by library staff. Patrons, students, and faculty receive physical materials in as little as two days, and electronic materials almost immediately.

This patron-initiated consortial borrowing system makes lending and borrowing materials between libraries as easy as processing local hold requests. Libraries who join see an increase in their circulation as a result of the expanded collection and easy-to-use shared catalog. Best of all, participating libraries see their shared resource expenses reduced by 70%.

ITC Systems

netZcore PRINT

NETZCORE PRINT (FORMERLY KNOWN AS GOPRINT)

ITC Systems introduced its first network print manager solution in 1995 and is one of the pioneers in the industry. The company offers more than 30 years of cutting-edge experience in integrated transaction control solutions.

netZcore Print, formerly branded as GoPrint, is a print and copy management system that enables public libraries, college and university libraries, public schools, medical and law libraries, special libraries, government institutions, and computer centers, to monitor printing and copying activity so they may maintain control over escalating printer and copier costs, reduce operating expenses, control printer usage, curb paper waste, and promote a more sustainable green printing and copying environment, all while helping to recover costs.

netZcore Print interfaces with all major campus OneCard systems: Cbord (Odyssey & CS Gold) Blackboard and Atrium and with major credit card gateways.

ITC Systems sells and supports netZcore PRINT to its customers directly, providing superior service and easy updates. The software is customizable and easy to scale.

Features & Benefits

- Secure web-based administration of software
- Multiple server platforms supported
- Wireless and mobile printing supported with netZcore PRINT Cloud
- Supports most operating systems
- Scalable for customer's environment and need
- Multiple payment options available

More information

ITC Systems

PAYSTATION ELITE

ITC Systems' PayStation ELITE is the perfect solution to charge for and control the use of copiers, printers and other applications.

The PayStation ELITE will control multifunction devices and charge for the copies and prints they produce. Featuring multiple price lines that can distinguish between different prices for color, black and white, page sizes, etc. The ELITE combines print release, add value to accounts, pay library fines and copy controller into a single unit.

The PayStation ELITE has a 7.5" Color LCD touch screen and can be equipped with a magnetic swipe, contactless, or barcode card reader for authentication purposes. Communication security is enhanced with SSL/TLS certification over the network. Once the user is authenticated, their print or copy transactions are processed, charged for and logged.

When authenticated, money can also be deposited into their account, or funds can be used to pay for the current transaction. Credit card acceptance is achieved using an integrated system based on cellular technology. Comes with netZcore PRINT (formerly known as GoPrint) Print Release Software embedded and ready to use.

In a library the ELITE will communicate to the LMS back end to retrieve patron information and any outstanding fines or fees. The ELITE will display the fine amount and the patron can pay using cash, credit/debit or from an account.

Benefits:

- Initiative for the user
- Payment all in one box
- Saves staff time
- Consolidates cash flow

Meescan Inc.

MEESCAN SELF-CHECKOUT

Meescan is a self-checkout system and smartphone app that's simple to install and effortless for patrons to use. It allows librarians to get on with what they do best: organizing the library's database, reaching out to their local community, helping people track down information, and engaging with patrons.

Meescan is a subscription-based self-checkout solution that is flexible enough to meet the needs of libraries of all kinds and sizes. Patrons can use the Meescan app for self-checkout on their personal devices or on your small Meescan kiosks in the library.

This self-checkout solution supports EM, RFID, and passaround security, and works with any ILS that supports SIP2.

Meescan also comes with a full suite of features at no extra cost, including wireless receipt printing, fee payments, touchless kiosk mode, curbside pickup, and returns.

CAPIRAREADY

CapiraReady is a mobile app ready to launch off the shelf. Simply choose from predesigned templates and add basic information about your library and services. Users can quickly engage by searching your catalog, using a digital library card, viewing your events calendar, and so much more. With a super quick implementation you can start offering this convenient app to your users in no time.

More information

ScheduleAnywhere

SCHEDULEANYWHERE

ScheduleAnywhere employee scheduling software allows library managers to create and manage schedules from any device with internet access. Employees have 24/7 access to real-time schedules via the mobile app. Managers can assign tasks to each shift and create an unlimited number of schedules for each location or department. They can instantly view how many employees are scheduled by service point and shift. Schedules can be shared between multiple departments, locations, and branches, so managers throughout the library system always know which

employees are scheduled and where they are assigned to work. Employees can submit cover, swap, time-off, and other schedule requests online. Managers can accept or deny the request; the schedule is immediately updated to reflect changes, and affected employees are notified. Managers can send messages to individuals, all employees, or a select group of qualified and available staff members or volunteers about open shifts, additional hours, or anything else they need to know. Additionally, the software tracks certifications and training, manages shift rotations and staff availability, and can estimate labor costs. Free trial accounts are available, and pricing is based on the number of employees scheduled.

LEO A DALY

ARCHITECTURE & DESIGN

Leo A Daly is a global design firm focused on reinventing libraries in the digital age. Through inquiry and design thinking, the firm works with libraries and their stakeholders to define a vision, navigate challenges, and craft elegant, sustainable and economical design solutions. For 100+ years, Leo A Daly's devotion to

craft, artistry and technical excellence has resulted in library environments of lasting beauty, functionality and relevance.

Leo A Daly's design approach stems from a deep belief in libraries as a core democratic institution – unparalleled in their ability to strengthen the social, economic and cultural fabric of communities. While this mission has remained true ever since Andrew Carnegie funded his first library, the tools and services needed to achieve it continue to evolve. Leo A Daly seeks to empower this evolution through inclusive, innovative and inquiry-based planning, architecture engineering and interior design.

Leo A Daly's portfolio of library work is distinguished by projects that provide a vital platform for community service and social change. Their libraries revitalize neighborhoods, empower disenfranchised people, increase literacy, incubate creativity, improve health, bring together cultures, facilitate workplace participation, and secure trustworthy information.

"We shape the spaces that shape democratic life."
